SAMPLE Almost any kind of soap will get you clean But beyond that what do we look for There are so many things to consider lather fragrance color and effects on the skin to name just a few Then there s the whole process of making that soap Is it easy or tricky How long does the soap need to age before it s safe and pleasant to use What additives are beneficial Which affect the chemistry of the process How can we get around difficulties How do you turn soapmaking into a business if that s what you want This almanac started life as a monthly magazine posted on my web site where I shared projects experiments and investigations I took up between writing my first three books on soap and lotion making There was a lot that never got into the books Along with practical questions I gave some attention to the social and cultural side of soap to attitudes and prejudices and myths I m fascinated by soap advertising and its claims and by the history of the daily process of cleaning ourselves our homes and our clothing All of that says a lot about where we ve been and maybe something about where we re going I m glad now to offer all this in the more enduring form of an almanac something to keep in your collection of soapmaking references Before we start though here are just a few practical notes Most important this is not a beginning soapmaker s how to book It contains many recipes but they re mostly just ingredients lists because I assume you already know how to make soap If you do need basic directions please see one or more of my other books especially *Smart Soapmaking* and *Milk Soapmaking* or any other reputable resource [Soap Making Recipes Book 3](#) Angela
