

Structural-Functional vs. Social-Conflict Theory

✓ Exclusively available on IvyPanda

The theory of structural functionalism define social institutions to be a collective whole necessary to fulfill the various needs of individuals and centers on the means by which these institutions meet their social needs. Structural functionalism says that for societies to survive they have to be stable and cohesive and this comes from solidarity. However, the conflict theory believes that a society runs on competition rather than solidarity and social harmony. It views society to be full of inequalities, which creates change and conflicts among all.

Structural functionalism emphasizes more on social order instead of social change unlike the conflict theory, which believes that fundamental changes and conflicts are unavoidable in a society. Structural functionalism believed that an individual is simply an occupant of his social role and are thus, not significant as only themselves but just because of their social roles and status. Thus, while structural functionalism believes that social inequality and oppression may be necessary for the stability, integration and functioning of a society, the conflict theory holds exploitation by dominant groups to be the main reason for social problems.

Although both these theories have dissimilar value orientations, they have the same perception about inequality, which is that the dominant groups profit from discrimination. Structural functionalism says that discrimination fits perfectly in a society since it yields positive results but the conflict theory says that social changes are inevitable and will take place continuously and rapidly since the various social groups are striving to take, each other's place in our societal hierarchy. (Fararo, 2001)

Structural functionalism says that when a society becomes complex differentiation takes place and integration takes place among the new institutions. Thus, even though changes occur structures inside a society emerge to compensate for the change. These new integrated structures guarantee the smooth running of our society and thus, it argues that the members are responsible for its stability and order. However, the conflict theory says that the probability of change is embedded in the basic structures and relations among the classes of our society. Therefore, when we reach a point where
