Social work is a profession that focuses on people of all ages. The definition given by the International Federation of Social Workers is,

The above definition states that social work values include solving problems, enhancing well-being, human rights, social justice, empowerment, social change and liberation. The definition of the word 'values' differs depending on whether you are talking about personal values or professional values. Personal values are a set of principles that support peoples actions or behaviours. Professional values are guidelines like the Code of Practice set up by the Care Council for Wales that all social care workers must adhere to. As a social worker our personal values must not interfere with our professional values. We must be professional at all times.

The role of a social worker is to shield vulnerable people, develop relationships and where possible help families to stay together while sticking to these guidelines. They also support people to enable them to live a happy life as possible. Social workers work as part of multi-disciplinary teams with other professions such as education, health and probation services. This is to make sure that all aspects of the service users life is taken into consideration when help is being discussed. If this is completed effectively no aspect of the service users life is left without any help if it is needed. Social workers work in various different organisations. Some work for local authorities in children and adult services departments there are also social workers working in hospitals and the voluntary and private sector.

The above value of social justice includes the need for resources to be distributed evenly amongst all members of society, to ensure that basic human needs are met. It is the members of society that are socially excluded that find it difficult to access these resources. Many people that social workers work with are socially excluded and discriminated against for a number of reasons. Social exclusion is defined as,

Social exclusion describes a way of life where opportunities are few, services are difficult to access and people lose hope. It is caused and upheld by a set of linked, and often recurring,

Pocket Guide to Preparing Social Work Research Articles Bruce Thyer, 2008-02-14 The art of writing up a completed research project in a format suitable for submission to a social work journal is an ability separate from one's skills as a research methodologist. It is also an ability that despite its importance is often overlooked by research courses and senior level mentors. This straightforward pocket guide to Preparing Research Articles steps into the void as an insider's guide to getting published. Drawing on nearly 20 years of experience editing a social work research journal, Bruce A. Thyer has crafted a candid companion to the journal publishing process, unraveling the mysteries that students as well as many established researchers might otherwise stumble over and as a result their prospectus for future success improve. Thyer's frank advice on selecting an appropriate journal, handling rejections and revisions, understanding confusing concepts like impact factors and electronic publishing, and avoiding common methodological and formatting pitfalls constitute a gold mine for the fledgling researcher/writer.

Social Work Research Skills Workbook Jacqueline Corcoran, Mary Secret, 2012-08-17 The required research sequence is perhaps the most dreaded element of a BSW or MSW program for students who don't see the applicability of research methods and data analysis to the real world of practice. With the move toward greater accountability and evidence-informed practice, though, students must be well equipped to be not only consumers but producers of research. Increase student research comfort and competency with the Social Work Research Skills Workbook, a hands-on practical guide that shows students how to apply what they learn about research methods and analysis to the research projects that they develop in their internships, field placements, or employment settings. At once a survival guide to the research requirement and a toolbox that practitioners can use in the field, this workbook promises to engage students in the research process and make them responsible, ethical, and informed producers of social work knowledge that produces better outcomes for their agencies and clients.
