

Most forms of advertising and marketing strategies are expensive and might prove to be prohibitive to companies that want to venture in the market or those that want to ensure that clients continue spending their money on products and services they offer.

This is a big advantage for advertising and marketing companies because they can spend the funds on other strategic goals of the company such as expansion (University of Michigan, 2009).

Individuals can also use social networking sites to advertise and package themselves as brands for prospective employers. Some companies have been known of using face book and other social networking sites as a means of checking whether the profiles of the individuals that they want to employ match with the job profiles of the positions that are open at their companies.

Social networking sites are used by friends and family members to keep in touch with each other. This aspect of the networking sites is important for individuals who might want to keep on communicating but they might be separated by geographical distance.

People can even post photos of important events such as birthdays, weddings, graduations and presentations to their friends and family members which help to strengthen the connection that would make them feel as if they are not as far from each other (Panda, 2009).

Individuals can form important groups, present and share ideas from people all over the world. Through such sites, people can be able to learn about cultures and traditional beliefs that are different from their own.

This would help to promote peace and harmony in the world because people can easily understand and appreciate cultures and beliefs that are different from their own.

Many relationships such as marriages and business partnerships have also resulted from social networking sites whereby, people start communicating through messages and learn that they have similar interests in life. Such individuals might decide to meet and strengthen their union or materialize their concepts into real practical ideas.

## **Cons of social networking sites**

As much as social networking sites and other forms of social media might be cited as conferring benefits to individuals, some cons have also been cited as arising from the use of social networking sites. Most of the social networking sites require individuals to give a lot of details about their personal information. This places the risk of identity theft or being stalked by other people on the social networking sites.
