Social Sciences Grade 9 Memorandum November 2014:

Building the Federal Schoolhouse Douglas S. Reed, 2014-05-29 Over the past fifty years the federal government's efforts to reform American public education have transformed U S schools from locally run enterprises into complex systems jointly constructed by federal state and local actors The construction of this federal schoolhouse an educational system with common national expectations and practices has fundamentally altered both education politics and the norms governing educational policy at the local level Building the Federal Schoolhouse examines these issues through an in depth fifty year examination of federal educational policies in the community of Alexandria Virginia a wealthy yet socially diverse suburb of Washington D C The epochal social transformations that swept through America in the past half century hit Alexandria with particular force transforming its Jim Crow school system into a new immigrant gateway district within two generations Along the way the school system has struggled to provide quality education for special needs students and has sought to overcome the legacies of tracking and segregated learning while simultaneously retaining upper middle class students Most recently it has grappled with state and federally imposed accountability measures that seek to boost educational outcomes All of these policy initiatives have contended with the existing political regime within Alexandria at times forcing it to a breaking point and at other times reconstructing it All the while the local expectations and governing realities of administrators parents politicians and voters have sharply constrained federal initiatives limiting their scope when in conflict with local commitments and amplifying them when they align Through an extensive use of local archives contemporary accounts school data and interviews Douglas S Reed not only paints an intimate portrait of the conflicts that the federal schoolhouse's creation has wrought in Alexandria but also documents the successes of the federal commitment to greater educational opportunity In so doing he highlights the complexity of the American education state and the centrality of local regimes and local historical context to federal educational reform efforts

The Achievement Gap in Reading Rosalind Horowitz, S. Jay Samuels, 2017-04-07 In this volume prominent scholars experts in their respective fields and highly skilled in the research they conduct address educational and reading research from varied perspectives and address what it will take to close the achievement gap with specific attention to reading The achievement gap is redefined as a level at which all groups can compete economically in our society and have the literacy tools and habits needed for a good life Bringing valuable theoretical frameworks and in depth analytical approaches to interpretation of data the contributors examine factors that contribute to student achievement inside the school but which are also heavily influenced by out of school factors such as poverty and economics ethnicity and culture family and community stratifications and approaches to measurement of achievement These out of school factors present possibilities for new policies and practice The overarching theme is that achievement gaps in reading are complex and that multiple perspectives are necessary to address the problem The breadth and depth of perspectives and content in this volume and its conceptualization of the achievement gap are a significant

contribution to the field **The Meritocracy Trap** Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people **Teach** Janice Koch,2019-01-02 Teach is a concise introduction to education that challenges students preconceived notions of teaching in order to transform them into reflective practitioners Empathizing with the difficulties students face as they move from the college classroom to their own classrooms revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession making the philosophy of teaching and learning accessible and relevant The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium InTASC standards correlating with each chapter s content With the guidance of this supportive text students will gain vital exposure by engaging with professional standards from the very start of their career *Handbook of Accessible Instruction and Testing Practices* Stephen N. Elliott,Ryan J. Kettler,Peter A. Beddow,Alexander Kurz,2018-03-08 The Second Edition of this handbook provides comprehensive coverage of the concept of accessibility and its application to the design and implementation of instruction and tests with all students It updates and expands on its original contents and responds to the increasing demand for research based evidence of accessible instruction and testing practices from the professional community Chapters explore how outcomes are affected when essential features or components of instructional materials and tests are not accessible to any portion of the student population The handbook addresses the new set of Standards for

Educational and Psychological Testing that was published in 2014 as well as requirements for a high level of access for all interim and summative tests by national testing consortiums In addition the handbook describes how the Center for Applied Special Technology CAST has continued to advance Universal Design for Learning UDL principles in mainstream education with teachers of all types of students not just students with disabilities Topics featured in this text include A summary of U S policies that support inclusive assessment for students with disabilities An overview of international policies that support inclusive assessments Designing developing and implementing an accessible computer based national assessment system Universal Design for Learning UDL principles and the future of assessment Recent advancements in the accessibility of digitally delivered educational assessments The Handbook of Accessible Instruction and Testing Practices Second Edition is an essential reference for researchers practitioners and graduate students in education and allied disciplines including child and school psychology assessment testing and evaluation social work and education policy and politics

The Methods and Ethics of Researching Unprovenanced Artifacts from East Asia Christopher J. Foster, Glenda Chao, Mercedes Valmisa, 2024-04-17 The immense outpouring of archaeological discoveries this past century has shed new light on ancient East Asia and China in particular Yet in concert with this development another more troubling trend has likewise gained momentum the looting of cultural heritage and the sale of unprovenanced antiquities Scholars face difficult questions from the ethics of working with objects of unknown provenance to the methodological problems inherent in their research The goal of this Element is to encourage scholars to critically examine their relationships to their sources and reflect upon the impact of their research The three essays in this Element present a range of disciplinary perspectives focusing on systemic issues and the nuances of method versus ethics with a case study of the so called Han board MSS given as a specific illustration This title is also available as open access on Cambridge Core

Handbook on Hybrid Organisations David Billis, Colin Rochester, 2020-02-28 Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today s societal problems One familiar set of examples are organisations that combine significant features from market public and third sector organisations Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars The chapters analyse and theorise the position of hybrid organisations and have important implications for theory practice and policy in a context of proliferating hybrid forms of organisation
