Presenting Counterpoints to the Dominant Terrestrial Narrative of European Prehistory John T. Koch,Mikael Fauvelle,Barry Cunliffe,Johan Ling,2025-05-31 Challenges the terrestrial focus of European prehistory emphasizing the significance of seascapes maritime networks and coastal societies in shaping prehistoric Europe For many years now the main thrust of European prehistory has followed a fundamentally terrestrial plot line This terrestrial paradigm has undervalued the story of Europe as a peninsula between the Baltic Mediterranean and Atlantic and likewise downplayed that of many navigable rivers that reach deeply inland and the large lakes important for travel and subsistence In vast areas of Europe the survival of incoming groups depended on coping and interacting with a seascape as much as a landscape From the late Mesolithic onwards in regions such as Scandinavia the British Isles and the Mediterranean most occupation was coastal seas or rivers provided the most important infrastructure for transport exchange and communication Know how about seascapes boatbuilding navigation and maritime networks had a profound impact on social organisation ritual monuments and iconography and the spread of materials and ideas enabled by the adaptation of languages to these new environments Given these facts the time is long overdue to critique the dominant terrestrial paradigm of European prehistory This book is the first in the multi author series Maritime Encounters outputs of the major six year 2022 2028 international research initiative funded by Sweden s central bank Our programme is based on a maritime perspective a counterpoint to prevailing land based vantages on Europe s prehistory In the Maritime Encounters project a highly international cross disciplinary team has embarked on a diverse range of research goals to provide a more detailed and nuanced story of how prehistoric societies realised major and minor sea crossings organised long distance exchange and adapted to ways of life by the sea in prehistory

Mobile Computer Usability Gamel O. Wiredu,2013-11-19 This book explains how mobile computer usability is shaped by the increasing integration of personal circumstances in organization It represents an attempt to conceptualize an alternative model of mobile computer usability It is motivated by the author s conviction that we do not yet have an adequate understanding of this concept because we have not taken seriously the transformation of human personality by the co evolution of organization and ICTs The author argues that the transformation has resulted in a human personality whose personal and organizational activities are characterized by strong continuities

between them This characterization reflects a new kind of personality of the worker and is a critical determinant of mobile computer usability The word organizational is used to describe this kind of personality hence an alternative organizational personality perspective on mobile computer usability This perspective suggests that a mobile computer is more usable to a person than another one because of its satisfaction of both his personal and organizational motives which are in turn shaped by the co evolution of organization technology and personality      *The Oxford Handbook of Animal Studies* Linda Kalof,2017-02-01 Intellectual struggles with the animal question how humans can rethink and reconfigure their relationships with other animals first began to take hold in the 1970s Over the next forty years scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time paying special attention to the commodification of animals the degradation of the natural world and a staggering loss of animal habitat and species extinction and the increasing need for humans to coexist with other animals in urban rural and natural contexts Linda Kalof maps these themes into the five major categories that structure this volume Animals in the Landscape of Law Politics and Public Policy Animal Intentionality Agency and Reflexive Thinking Animals as Objects in Science Food Spectacle and Sport Animals in Cultural Representations and Animals in Ecosystems Written by international scholars with backgrounds in philosophy law history English art sociology geography archaeology environmental studies cultural studies and animal advocacy the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings      *Human Rights, Diversity, and National Identity* Patricia E. Bromley,2011 Fundamental world changes that simultaneously undermine a nation state s charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country Globally primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education The analyses consist of two sections Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970 2008 These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia BC which examines nation building within a context of strong emphasis on diversity and human rights The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871 It also draws on a selection of historical documents including Ministry of Education reports curricular frameworks and

high school exit exams Process wise I find the incorporation of human rights and diversity reflects macro level changes in national and global society Content wise I find four main approaches to reconciling ideas of human rights and diversity with national identity 1 framing human rights and multiculturalism as part of national identity 2 using pedagogical approaches that promote multiple perspectives and individual agency 3 celebrating social and scientific figures and accomplishments as the source of national pride and 4 drawing on exogenous sources to affirm state legitimacy This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world Further students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change
