From unsafe working conditions in garment manufacturing to the failure to consult indigenous communities with regard to extractive industries that affect them, human rights violations remain a pervasive aspect of the global economy. Advocates have long called upon states as the primary duty bearers and enforcers of human rights to hold corporations directly accountable for violations committed throughout the supply chain. More recently, many business and human rights advocates have considered the development and enforcement of private regulatory initiatives (PRIs) to certify that actors along the supply chain conform to certain codes of conduct. Many advocates see these PRIs as holding the potential to create better outcomes, whether for workers, affected communities, or the environment within a global economy structured by supply chain capitalism. This volume brings together academics and practitioners from a number of regions throughout the world to engage in theoretical analysis, case study exploration, and reflection on a variety of PRIs. Theorizing

outward from the work of practitioners and activists on the ground the book brings essential but often overlooked questions to the scholarly debates on business human rights and global governance Ultimately the contributions coalesce around one basic claim that the inequalities and disparities of power and wealth that are a key characteristic of the contemporary global economy can also mark the origins and operation of PRIs and do so to varying degrees The collection highlights the need for discussions about labor environmental and other human rights accountability to be situated within a broader analysis of the political economy of contemporary supply chain capitalism It seeks to enrich discussions of PRIs by bringing into the conversation concerns about distributive justice and political economy Annual Report of the Education Department
