Social Work Diagnosis in Contemporary Practice Francis J. Turner, 2005-02-10 The unifying theme of this broad reaching volume is that responsible ethical and effective social work practice rests on the diagnostic skills of the practitioner Social work diagnosis refers to the conscious formulation of an ongoing set of decisions about the client and his or her situation which serve as the basis for intervention decisions for which the practitioner must be prepared to take responsibility Diagnostic skill development is an ongoing process principally enhanced by a continuous commitment to remain at the cutting edge of the profession's body of knowledge but one of the challenges for today's practitioner is keeping abreast of the rapidly expanding body of knowledge contained in some 200 important social work periodicals in circulation Francis J Turner a preeminent clinical scholar brings together in one volume some of the best work published since 2000 each reflecting new insights into understanding psychosocial situations and innovative methods of applying knowledge and skills in an increasingly effective manner Each of the 78 articles in this volume highlights some of the critical dimensions of contemporary social work practice guiding clinicians to address four key aspects in order to craft an accurate diagnosis The first section presents articles covering the developmental spectrum each of which fully explains various ages and stages of development The second section focuses on a range of specific situations helping practitioners and students enrich their understanding of different types of problems they meet in contemporary practice whether they are based in mental illness psychosocial issues or physical ailments The third section addresses the crucial component of diversity demonstrating the complexity and critical importance of truly understanding clients and their lives The last section of the book discusses innovative approaches to practice selected to offer practitioners easy access to the latest interventions for a host of

the first book to focus on the scope of social work practice within military settings from an international perspective and therefore addresses what has been a significant gap in the literature Given the critical support needs of military personnel and their families worldwide and the expanding role of social work in responding to these needs this book offers a comprehensive global understanding of the common military social work MilSW practices with active duty military service members and their families as well as the forms of practice and approaches that are unique or potentially transferable across nations Based on a systematic inquiry conducted by the Editors there are at least 25 countries that have social workers

working directly within their country's military in either a civilian or uniformed capacity or both. This book includes contributions from experts in Australia, Canada, Denmark, Finland, Ireland, Israel, the Netherlands, New Zealand, South Africa, the UK, and the USA who describe various aspects of the MilSW role within their country and the research that informs what military social workers do. The MilSW similarities and differences among these countries are highlighted, including developmental milestones, practice settings, practice orientation, and approach, ethical dilemmas, military to veteran transition support, and past and current challenges. Experts from countries that do not yet have MilSW but are interested in developing it (Japan, Ukraine) or are in the process of establishing this area of practice (Slovakia) also contribute chapters about these developments and the evidence base that supports this direction. *Military Social Work Around the Globe* is a valuable resource for social work programs and essential reading for instructors and students in MilSW electives and specializations. It is also pertinent reading for occupational social work and international social work courses. In addition, this book is an important source of information for military social workers who would like to gain insights into existing programs and the possibilities for international collaboration and for countries interested in developing MilSW.

**Policy Practice for Social Workers** Linda Cummins, Katharine V Byers, Laura Pedrick, 2023-07-18

The second edition of *Policy Practice for Social Workers* expands the concept of policy practice in social work settings and illustrates how significant policy change may be achieved at a local, community, state, and national level. Guided by an ethic of care approach, this textbook is intended to raise readers' awareness about policy practice and its fundamental relationship with the aims of the social work profession, offers a foundation for key skill development, and contextualizes the work of policy practitioners in the larger political economic settings in which they work. This textbook is divided into two parts. First, readers will expand their understanding of policy practice, its beginnings, and development over the course of social welfare history and the political economic and social drivers that affect policy decisions and undergird the U.S. political system. Readers will also learn about the ethic of care framework and the value-based lens it contributes to the policymaking process. Later in the book's second part, readers will explore the essential skills and values in policy work. Detailed coverage and vivid examples offer valuable insight into specific advocacy skills, including lobbying, community organizing, mobilizing, advocacy, public coalition building, campaigning, problem analysis, policy analysis, and policy evaluation. Within its comprehensive overview of policy practice and advocacy, the new edition of this text extols a value-laden perspective to identify and assess unmet needs and promote a more socially just environment for all. Combining these dual aims, *Policy Practice for Social Workers* is an excellent cornerstone of policy and policy work for undergraduate and graduate students in social work.
