Kalifungwa, 2025-03-19 All knowledge including the most basic taken for granted common sense

knowledge of everyday reality is derived from and maintained by social interaction In their model people interact on the understanding that their perceptions of everyday life are shared with others and this common knowledge of reality is in turn reinforced by this interaction Social structure can also be said to be the framework upon which a society is established It determines the norms and patterns of relations between the various institutions of the society Social norms are believed to influence social structures through relations between the majority and the minority As those who align with majority are considered normal and those who align with the minority are considered abnormal majority minority relations create a hierarchical stratification within social structures that favors the majority in all aspects of society Social theory by definition is used to make distinctions and generalizations among different types of societies and to analyze modernity as it has emerged in the past few centuries Social thought provides general theories to explain actions and behavior of society as a whole encompassing sociological political and philosophical ideas Social transformation in this context requires a shift in collective consciousness of a society local state national or global so that reality is refined by consensus This often happens by external stimulus and sometimes intentionally Social transformations are such when they sustain overtime where attitudes and values are held in a completely new context or paradigm based upon different assumptions and beliefs Mindset is an established set of attitudes especially regarded as typical of a particular group social or cultural values the outlook philosophy or values of a person now also more generally frame of mind attitude frecte and disposition A mindset may also arise from a person s world view or philosophy of life Ideas are just thoughts but implementing and acting on these ideas in our own lives is what will make it habitual and allowing a change in mind set

STRUCTURE AND CHOICE Chen Binggong,2021-04-05 This book employs the methods of philosophical anthropology to examine the question of what the noumenon of human life is which has been debated for thousands of years This work elaborates upon the noumenon of human life that is man s structure and choice The noumenon of human life differs essentially from the animals in bringing about the unity of structure and choice The noumenon of human life or rather man s structure and choice provides the motive force for the survival and development of individuals and groups families organizations and states as well as the basic ways in which human values can be possible of realization It is only through the instrumentality of man s structure and choice that humans can attain their goals and grasp the laws of development and change of things In passing criticism upon structuralism and existentialism the author tries to reconstruct the ontology of human life whereby his theory provides an ontological foundation for the humanities and social sciences a theoretical framework for an idealistic anthropological commitment to self transcendence a scientific philosophy of life for us and a good deal of enlightenment about many theoretical prerequisites

Alternative Sociologies of Religion James V. Spickard, 2017-03-14 Uncovers what the sociology of religion would look like had it emerged in a Confucian Muslim or Native American culture rather than in a Christian one Sociology has long used Western Christianity as a model for all religious life As a result the field has tended to highlight aspects of religion that Christians find important such as religious beliefs and formal organizations while paying less attention to other elements Rather than simply criticizing such limitations James V Spickard imagines what the sociology of religion would look like had it arisen in three non Western societies What aspects of religion would scholars see more clearly if they had been raised in Confucian China What could they learn about religion from Ibn Khaldun the famed 14th century Arab scholar What would they better understand had they been born Navajo whose traditional religion certainly does not revolve around beliefs and organizations Through these thought experiments Spickard shows how non Western ideas understand some aspects of religions even of Western religions better than does standard sociology The volume shows how non Western frameworks can shed new light on several different dimensions of religious life including the question of who maintains religious communities the relationships between religion and ethnicity as sources of social ties and the role of embodied experience in religious rituals These approaches reveal central aspects of contemporary religions that the dominant way of doing sociology fails to notice Each approach also provides investigators with new theoretical resources to guide them deeper into their subjects The volume makes a compelling case for adopting a global perspective in the social sciences

Cockerham,2020-07-09 Sociological Theories of Health and Illness reviews the evolution of theory in medical sociology beginning with the field s origins in medicine and extending to its present day standing as a major sociological subdiscipline Sociological theory has an especially important role in the practice of medical sociology because its theories distinguish the subdiscipline from virtually all other scientific fields engaged in the study of health and illness The focus is on contemporary theory because it applies to contemporary conditions however since theory in sociology is often grounded in historical precedents and classical foundations this material is likewise included as it relates to medical sociology today This book focuses on the most commonly used sociological theories in the study of health and illness illustrating their utility in current examples of empirical research on a wide range of topics The qualitative or quantitative research methods applicable to specific theories are also covered Distinctions between macro and micro level levels of analysis and the relevance of the agency structure dichotomy inherent in all theories in sociology are discussed Beginning with classical theory Durkheim Weber and Marx and the neglected founders Gilman Martineau and DuBois along with symbolic interaction Mead Strauss and labeling theory Becker and poststructuralism and postmodernism Foucault coverage is extended to contemporary medical sociology Discussion of the stress process model Pearlin is followed by the social construction of gender and race and intersectionality theory Collins health lifestyle theory Cockerham life course theory Elder fundamental cause theory Link and Phelan and theories of the medical profession Freidson medicalization and biomedicalization Conrad Clarke and social capital Bourdieu Putnam and Lin *The Sacred Project of American Sociology* Christian Smith,2014-07-03 Counter to popular perceptions contemporary American sociology is and promotes a profoundly sacred project at heart Sociology today is in fact animated by sacred impulses driven by sacred commitments and serves a sacred project Sociology appears on the surface to be a secular scientific enterprise its founding fathers were mostly atheists Its basic operating premises are secular and naturalistic Sociologists today are disproportionately not religious compared to all Americans and often irreligious The Sacred Project of American Sociology shows counter intuitively that the secular enterprise that everyday sociology appears to be pursuing is actually not what is really going on at sociology s deepest level Christian Smith conducts a self reflexive tables turning cultural and institutional sociology of the profession of American sociology itself showing that this allegedly secular discipline ironically expresses Emile Durkheim s inescapable sacred exemplifies its own versions of Marxist false consciousness and generates a spirited reaction against Max Weber s melancholically observed disenchantment of the world

American sociology does not escape the analytical net that it casts over the rest of the ordinary world Sociology itself is a part of that very human very social often very sacred and spiritual world And sociology s ironic mis recognition of its own sacred project leads to a variety of arguably self destructive and distorting tendencies This book re asserts a vision for what sociology is most important for in contrast with its current commitments and calls sociologists back to a more honest fair and healthy vision of its purpose
