W. Powell, 2015-12-03 Barriers to Inclusion offers a comparative and historical account of the rise of special education over the twentieth century in the United States and Germany This institutional analysis demonstrates how categorical boundaries professional groups social movements and education and social policies shaped the schooling of children and youth with disabilities It traces the evolution of special education classification explores growing special education organizations and examines students learning opportunities and educational attainments Highlighting cross national differences over time the author also investigates demographic and geographic variability within the federal democracies especially in segregation and inclusion rates of disabled and disadvantaged children Germany's elaborate system of segregated special school types contrasts with diverse American special education classrooms mainly within regular schools Joining historical case studies with empirical indicators this book reveals persistent barriers to school integration as well as factors that facilitate inclusive education reform in both societies Brooklyn Public Library News Bulletin Brooklyn Public Library, 1920 Health, Hazards and Public Debate Carlos Dora, 2006 This publication is based on research into the strategies used to communicate information to the public about the risks of BSE bovine spongiform encephalopathy and CJD Creutzfeldt Jakob disease in four European countries the UK Germany Italy and Finland between 1985 and 2000 through political means and health information systems as well as through mass media reporting of the issue It considers the lessons to be learned from the BSE CJD crisis given the need for timely and effective communication on real and perceived risks in such situations both to prevent and to respond to food and environmental health scares The book approaches the debate about effective risk communication as an evolving and interactive process between decision makers and their publics and emphasises the importance of creating mechanisms for interaction at all stages of policy making Using a range of qualitative and quantitative methods the research also looks at the way people construct their perceptions about risk and how they make decisions on risk avoidance Political Pilgrims Paul Hollander, 2017-07-05 Why did so many distinguished Western Intellectuals from G B Shaw to J P Sartre and closer to home from Edmund Wilson to Susan Sontag admire various communist systems often in their most repressive historical phases How could Stalin's Soviet Union Mao's China or Castro's Cuba appear at one time as both successful modernizing societies and the fulfillments of the boldest dreams of social justice Why at the same time had these intellectuals so mercilessly judged and rejected their own Western liberal cultures What Impulses and beliefs prompted them to seek the realization of their ideals in distant poorly known lands How do their journeys fit into long standing Western traditions of looking for new meaning In the non Western world These are some of the questions Paul Hollander sought to answer In his massive study that covers much of our century His success is attested by the fact that the phrase political pilgrim has become a part of

intellectual discourse Even in the post communist era the questions raised by this book remain relevant as many Western and especially American intellectuals seek to come to terms with a world which offers few models of secular fulfillment and has tarnished the reputation of political Utopias His new and lengthy introduction updates the pilgrimages and examines current attempts to find substitutes for the emotional and political energy that used to be invested in them **Who's who in America** John W.
