Numerical Models in Geomechanics G.N. Pande, S. Pietruszczak, 2004-08-15 Reflecting the current research and advances made in the application of numerical methods in geotechnical engineering this volume details proceedings of the Ninth International Symposium on Numerical Models in Geomechanics NUMOG IX held in Ottawa Canada 25-27 August 2004 Highlighting a number of new developments in the area papers concentrate upon the following four main areas: constitutive relations for geomaterials; numerical algorithms; formulation and performance; modelling of transient coupled and dynamic problems; application of numerical techniques to practical problems. Representing the most advanced modern findings in the field, *Numerical Models in Geomechanics* is a comprehensive and impeccably researched text ideal for students and researchers as well as practising engineers

Advances in Spatio-Temporal Analysis Xinming Tang, Yaolin Liu, Jixian Zhang, Wolfgang Kainz, 2007-08-23 Developments in Geographic Information Technology have raised the expectations of users. A static map is no longer enough; there is now demand for a dynamic representation. Time is of great importance when operating on real world geographical phenomena, especially when these are dynamic. Researchers in the field of Temporal Geographical Information Systems (TGIS) have been developing methods of incorporating time into geographical information systems. Spatio-temporal analysis embodies spatial modelling, spatio-temporal modelling and spatial reasoning and data mining. *Advances in Spatio-Temporal Analysis* contributes to the field of spatio-temporal analysis presenting innovative ideas and examples that reflect current progress and achievements

Constitutive Modeling of Geomaterials Qiang Yang, Jian-Min Zhang, Hong Zheng, Yangping Yao, 2012-08-22 The Second International Symposium on Constitutive Modeling of Geomaterials: Advances and New Applications (ISCM 2012) is to be held in Beijing, China during October 15-16, 2012. The symposium is organized by Tsinghua University, the International Association for Computer Methods and Advances in Geomechanics (IACMAG), the Committee of Numerical and Physical Modeling of Rock Mass (Chinese Society for Rock Mechanics and Engineering) and the Committee of Constitutive Relations and Strength Theory (China Institution of Soil Mechanics and Geotechnical Engineering), China Civil Engineering Society. This Symposium follows the first successful International Workshop on Constitutive Modeling held in Hong Kong which was organized by Prof. JH Yin in 2007. Constitutive modeling of geomaterials has been an active research area for a long period of time. Different approaches have been used in the development of various constitutive models. A number of models have been implemented in the numerical analyses of geotechnical structures. The objective of the symposium is to provide a forum for researchers and engineers working or interested in the area of constitutive modeling to meet together and share new ideas, achievements and experiences through presentations and discussions. Emphasis is placed on recent advances of constitutive modeling and its applications in both

theoretic and experimental aspects Six famous scholars have been invited for the plenary speeches of the symposiums Some prominent scholars have been invited to organize four specialized workshops on hot topics including Time dependent stress strain behavior of geomaterials Constitutive modeling within critical state soil mechanics Multiscale and multiphysics in geomaterials and Damage to failure in rock structures A total of 49 papers are included in the above topics In addition 51 papers are grouped under three topics covering Behaviour of geomaterials Constitutive model and Applications The editors expect that the book can be helpful as a reference to all those in the field of constitutive modeling of geomaterials
