

"Most malware and client-side attacks have a social engineering component to deceive the user into letting the bad guys in. You can patch technical vulnerabilities as they evolve, but there is no patch for stupidity or rather gullibility. Chris will show you how it's done by revealing the social engineering vectors used by today's intruders. His book will help you gain better insight on how to recognize these types of attacks." —**Kevin Mitnick**, Author, Speaker, and Consultant
