## **Socializing Through Networks Introduction To Social Networking:**

Socializing Through Networks Brian George, 2014-12-25 The friends that you can make are just one of the many benefits to social networking online Another one of those benefits includes diversity because the internet gives individuals from all around the world access to social networking sites This means that although you are in the United States you could develop an online friendship with someone in Denmark or India Not only will you make new friends but you just might learn a thing or two about new cultures or new languages and learning is always a good thing As mentioned social networking often involves grouping specific individuals or organizations together While there are a number of social networking websites that focus on particular interests there are others that do not The websites without a main focus are often referred to as traditional social networking websites and usually have open memberships This means that anyone can become a member no matter what their hobbies beliefs or views are However once you are inside this online community you can begin to create your own network of friends and eliminate members that do not share common interests or goals Get more info here
