

1. QUALITATIVE AND QUANTITATIVE METHODOLOGIES

<i>Aim</i>	To compare quantitative and qualitative methods
<i>Skills</i>	Evaluation, analysis and knowledge and understanding
<i>Time</i>	40-60 minutes depending on group size
<i>Preparation</i>	None

Student activity

Students brainstorm differences between quantitative and qualitative methods as a whole group.

Each student then takes the role of a positivist who favours the exclusive use of quantitative methods. They spend 5/10 minutes writing a letter to the person on their right who they should imagine to be an interpretivist who uses qualitative methods only. The brief letter should be both a criticism of the qualitative approach and an explanation of the superiority of quantitative methodology.

Students then pass the letter on to the person on their right and now read the letter they receive as if they are an interpretivist. They write a reply defending qualitative approaches and making critical points about the positivist position.

The process can be repeated as many times as you wish, letters either being swapped or passed on around the class.

Teacher notes

Students find it easier to write critical evaluative comments when addressing each other. Though they may struggle initially to find more to say as each exchange of letters occurs, they are pushed to evaluate further. Students benefit from seeing the work of other students and may transfer ideas gleaned from the person on the left to the person on the right, thus assisting peer learning.

The Pedagogy of Pop Edward Janak, Denise F. Blum, 2013 Media competes with public schools in terms of student engagement and time However the two needn't be mutually exclusive *The Pedagogy of Pop* Theoretical and Practical Strategies for Success discusses a variety of strategies and approaches for using social and mass media as tools through which teachers might improve schooling While there is a vast body of literature in this field editors Edward A Janak and Denise Blum have created a text which differs in two substantive ways scope and sequence In terms of scope this work is unique in two facets first it presents both theory and practice in one volume bridging the two worlds and second it includes lessons from secondary and postsecondary classrooms allowing teachers on all levels to learn from each other In terms of sequence *The Pedagogy of Pop* draws on lessons from both historical and contemporary practice The introductory section of Janak and Blum's collection presents a pair of papers that use somewhat different approaches to examine the historical roots of contemporary critique Part I presents a series of chapters designed to provide guidelines and theories through which educators on all levels can think about their practice focusing more on the why of their approach than the how Part II presents a more hands on approach by sharing a variety of

often neglected in blended learning research but are critical discussions to be had. *Re Envisioning and Restructuring Blended Learning for Underprivileged Communities* shares how institutions in the developing world and less privileged communities have reimagined and restructured blended education to enhance teaching and learning for underprivileged communities. This book aims to address blended learning solutions across institutional, program, course, and activity levels. This book is ideally intended for teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in blended learning opportunities in less privileged settings and to underserved and marginalized populations.

International Handbook of Research on Multicultural Science Education Mary M. Atwater, 2022-06-30. This handbook gathers in one volume the major research and scholarship related to multicultural science education that has developed since the field was named and established by Atwater in 1993. Culture is defined in this handbook as an integrated pattern of shared values, beliefs, languages, worldviews, behaviors, artifacts, knowledge, and social and political relationships of a group of people in a particular place or time that the people use to understand or make meaning of their world, each other, and other groups of people, and to transmit these to succeeding generations. The research studies include both different kinds of qualitative and quantitative studies. The chapters in this volume reflect differing ideas about culture and its impact on science learning and teaching in different K-14 contexts and policy issues. Research findings about groups that are underrepresented in STEM in the United States and in other countries, related to language issues and indigenous knowledge, are included in this volume.

Economic Lives Viviana A. Zelizer, 2013-03-24. Revealing the human side of economic life. Over the past three decades, economic sociology has been revealing how culture shapes economic life, even while economic facts affect social relationships. This work has transformed the field into a flourishing and increasingly influential discipline. No one has played a greater role in this development than Viviana Zelizer, one of the world's leading sociologists. *Economic Lives* synthesizes and extends her most important work to date, demonstrating the full breadth and range of her field-defining contributions in a single volume for the first time. *Economic Lives* shows how shared cultural understandings and interpersonal relations shape everyday economic activities. Far from being simple responses to narrow individual incentives and preferences, economic actions emerge, persist, and are transformed by our relations to others. Distilling three decades of research, the book offers a distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly

impersonal worlds of production consumption and asset transfer Economic Lives ranges broadly from life insurance marketing corporate ethics household budgets and migrant remittances to caring labor workplace romance baby markets and payments for sex These examples demonstrate an alternative approach to explaining how we manage economic activity as well as a different way of understanding why conventional economic theory has proved incapable of predicting or responding to recent economic crises Providing an important perspective on the recent past and possible futures of a growing field Economic Lives promises to be widely read and discussed *The Politics of Jurisprudence* Roger B. futures moving beyond the narrow confines of existing debate and providing a forum for debating what planning is and should be for in how we plan cities and regions The chapters in this book were originally published as a special issue of Regional Studies

School Organisation (RLE Edu L) William Tyler, 2012-05-16 The internal organisation of the school touches on many areas of contemporary debate Is there such a thing as a good school Are large urban comprehensives necessarily impersonal Are the charges of indiscipline conflict and declining standards in modern schools based on a failure to understand schools as institutions At the time this book was first published sociological analysis had neglected to consider schools as organisational entities preferring to see them as either the sites for negotiated encounters between teachers and pupils or else as agencies of class reproduction The author redresses this imbalance and by relating the various literatures on the school to the constitutive patterns of its internal organisation he demonstrates the need for a more intensive sociological study of this embattled institution
