Policy Analysis in France Charlotte Halpern, Patrick Hassenteufel, Philippe Zittoun, 2018-01-03

Understanding policy analysis in France requires first a thorough exploration of the distinction usually made in French academic and practitioner debates between policy studies and policy analysis essentially the difference between studies of policy and studies designed for the use of policy This book begins there then delves into questions of how and by whom knowledge of policies is produced within and outside the French state showing that while the tension between the two types of study is real the continued exchange of ideas between them has led to an enrichment of both spheres The book thus lays the foundation for a more systematic understanding of policy analysis in France

Questioning the boundaries between politics and economics Jean Louis Laville's large body of work has focused on an intellectual history of the concept of solidarity since the Industrial Revolution In *The Solidarity Economy* his most famous distillation of this work Laville establishes how the formations of economic solidarities unions activism and other forms of associationalism reveal that the boundaries between politics and economics are porous and structured such that politics ideally a pure expression of ethics and values is instead integrated with economic concerns Exploring the possibilities and long histories of association *The Solidarity Economy* identifies the power of contemporary social and solidarity movements and examines the history of postcapitalist practices in which democratic demands invade the heart of the economy *The Solidarity Economy* ranges in focus from workers associations in France dating back to the nineteenth century to associations of African Americans and feminists in the United States in the late nineteenth and early twentieth centuries to a Brazilian landless worker coalition in the twentieth century Studying solidarity associations over time allows us to examine how we can recombine the economic and political spheres to address dependencies and inequalities Ultimately *The Solidarity Economy* has global scope and inspiring examples of associations that deepen democracy *Cycling Through the Pandemic* Nathalie Ortar, Patrick Rérat, 2023-11-16 This open access book provides insight on how the tactical urbanism has the capacity to influence change in mobility practices such as cycling COVID 19 crisis prompted the public authorities to rethink the use of public space in order to develop means of transport that are both efficient and adapted to the health context and their effects on cycling practices in Europe North and South America Its contributors collectively reveal and evidence through policies analysis mapping and innovative qualitative analysis bridging video and interviews how those new infrastructures and policies can be a trigger for change in a context of mobility transition This book provides an important element on the way local authorities can act in a quicker and more agile way While some decisions are specific to the context of the beginning of the pandemic the analysis offers lessons on the way to implement the transition toward a low carbon mobility on the importance of processes based on trials and errors on the political stakes of reallocating road space

European Cities Patrick Le Galès, 2002-08-08 European cities are on the rise and are taking advantage of the opportunities of the European integration and globalization processes But they also face economic changes social inequalities poverty and a new set of constraints Taking examples through the European Union *European Cities* explores the impact of the transformation of the nation states on cities and the change of local societies and local governments It argues that new

modes of urban governance are emerging and that cities are becoming collective actors within European governance European Cities shows why and how the bulk of European cities still appear to be original forms of compromise aggregation representation of diverse interests and culture Different modes of governance are gradually being structured in most middle size European cities despite processes of social exclusion segregation accompanied by the increased mobility of some citizens Are Europeans going to invent a new form of institutionalized and territorialized capitalism of which medium sized European cities will be one of the pillars and one of the actors Failing that the effects of changing scales could be expressed as profound transformations of the European urban model European Societies Series Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent
