##### A. *"The Demeaning of Work," by Barry Schwartz*

1. *According to Schwartz, our human nature instills one attitude towards work, while the "official ideology" of our culture promotes an opposing attitude. Explain. The official ideology fosters a "job" mentality toward work, but work can also be viewed as a "career," or as a "calling." What's the difference? And what are the shortcomings of a career mentality?*

-Official ideology = don't enjoy working. Only work to play. Work is a drudgery. But it's human nature to want to work. Work is profane, no longer sacred.

-Job= impermanent career to make money. Not looking for promotion, and it doesn't feel demoralized. Not much demand for college degree. Almost demoralizing. Care less about job performance.

-Career= seek to work up the ladder. Advancement is a lot of work. Shortcomings: burn people out, most people get stuck. (usually late 30s/early 40s) people lose interest, become cynical and self-serving.

-Calling= love arriving and hate leaving. Think work is purposeful and valuable. (A teacher that feels they are touching the lives of kids). Doctor. Being in it to actually save lives and get meaning out of their job. Restore calling through co-ops.

2. *How does a market society demean work, i.e., reduce all work to unsatisfying "jobs?" If it is human nature to want satisfying and socially valued work, then why would anyone willingly submit to a life of work that is menial and deadening?*

They need money. Work is commodified. We spend our lives doing what we don't want to do in a place we don't want to be but we do for money. Maximization of efficiency = lose calling. Work becomes just a job because workers are replaceable.

3. *How does Schwartz propose to transform work into a "calling" through "producer cooperatives?" What are the obstacles to this transformation?*

-Co-ops want to restore the calling. Profit sharing amongst workers = stock. Structure work. More freedom, autonomy, creativity. Customers are the owners. Workers have ownership stake. When workers have a stake, there will be better products because they want the store to do well and people are there to actually help people. The stock is money as well as decision-making, quality control and supervision. The environment makes it feel less like a job. Customers=proprietors. Workers there to serve people.

-Obstacle: People just want cheap. It is a time consuming process. It should not be in the workplace, but in the school. People do not understand of co-ops so it is hard to get them on board.

##### B. *The Corporation as Invisible Government," by Charles Reich*

1. *People are both more dependent and more dominated by private corporate government than by public government. Explain.*

In private- workers have little to no control. They must submit to authority of employers. Non-democratic. It is an oligarchy so it is controlled by few.

90% of people work for other people. Workers are subservient and voluntary.

## **Sociology Spring 2012 Review:**

*In Defense of Disciplines* Jerry A. Jacobs, 2014-02-05 Calls for closer connections among disciplines can be heard throughout the world of scholarly research from major universities to the National Institutes of Health *In Defense of Disciplines* presents a fresh and daring analysis of the argument surrounding interdisciplinarity Challenging the belief that blurring the boundaries between traditional academic fields promotes more integrated research and effective teaching Jerry Jacobs contends that the promise of interdisciplinarity is illusory and that critiques of established disciplines are often overstated and misplaced Drawing on diverse sources of data Jacobs offers a new theory of liberal arts disciplines such as biology economics and history that identifies the organizational sources of their dynamism and breadth Illustrating his thesis with a wide range of case studies including the diffusion of ideas between fields the creation of interdisciplinary scholarly journals and the rise of new fields that spin off from existing ones Jacobs turns many of the criticisms of disciplines on their heads to mount a powerful defense of the enduring value of liberal arts disciplines This will become one of the anchors of the case against interdisciplinarity for years to come **Beyond Bad Apples** Michelle Tuveson, Daniel Ralph, Kern

Alexander, 2020-05-28 The one bad apple spoiling the whole barrel has become a common metaphor used with reference to risk culture in organisations This inside out perspective begins with the individual as the unit of analysis and follows with inferences to the broader environment Since the Global Financial Crisis GFC of 2008 risk culture for many has become the explanation for shortcomings poor decisions and moral failures in organisations This volume presents an institutional perspective of the forces that shape risk culture and culture more generally in organisations through a multi disciplinary examination from a variety of leading academics and subject specialists The authors demonstrate that firms play a role as manufacturers and managers of risk and they challenge common conceptions that attribute risk to chance circumstances or rogue behaviours The foundational concepts needed for an institutional view of risk culture are highlighted with subsequent links to significant developments within society and firms **Ethnic China** Xiaobing Li, Patrick Fuliang Shan, 2015-10-16

There are some serious concerns and critical questions about the on going minority protesting in China such as Tibetan monks self immolations Muslims suicide bombings and Uyghur large scale demonstrations Why are minorities such as the Uyghur dissatisfied when China is rising as a world power What kind of struggle must they go through to maintain their identity heritage and rights How does the government deal with this ethnic dissatisfaction and minority riots And what is ethnic China's future in the 21st century *Ethnic China* examines these issues from the perspective of Chinese American scholars from fields such as economics political science criminal justice law anthropology sociology and education The contributors introduce and explore the theory and practice of policy patterns political systems and social institutions by identifying key issues in Chinese government society and ethnic community contained within the larger framework of the international sphere Their endeavors move beyond the existing scholarship and seek to spark new debates and proposed

solutions while reflecting on established schools of history religion linguistics and gender studies *Marginal People in Deviant Places* Janice M. Appropriate for the introductory course in sociology 2014 772 pages      **Routledge Handbook of Illiberalism** András Sajó, Renáta Uitz, Stephen Holmes, 2021-11-29 The Routledge Handbook of Illiberalism is the first authoritative reference work dedicated to illiberalism as a complex social political cultural legal and mental phenomenon Although illiberalism is most often discussed in political and constitutional terms its study cannot be limited to such narrow frames This Handbook comprises sixty individual chapters authored by an internationally recognized group of experts who present perspectives and viewpoints from a wide range of academic disciplines Chapters are devoted to different facets of illiberalism including the history of the idea and its competitors its implications for the economy society government and the international order and its contemporary iterations in representative countries and regions The Routledge Handbook of Illiberalism will form an important component of any library s holding it will be of benefit as an academic reference as well as being an indispensable resource for practitioners among them journalists policy makers and analysts who wish to gain an informed understanding of this complex phenomenon      *Cosmopolitanism* Zlatko Skrbis, Ian Woodward, 2013-04-29 Cosmopolitanism Uses of the Idea offers an illuminating and dynamic account of an often confusing and widespread concept Bringing together both historical and contemporary approaches to cosmopolitanism as well as recognizing its multidimensional nature Zlatko Skrbis and Ian Woodward manage to show the very essence of cosmopolitanism as a theoretical idea and cultural practice Through an exploration of various social fields such as media identity and ethics the book analyses the limits and possibilities of the cosmopolitan turn and explores the different contexts cosmopolitanism theory has been and still is applied to Critical diverse and engaging the book successfully answers questions such as How can we understand cosmopolitanism What is the relationship between cosmopolitanism and ethics What is the relationship between cosmopolitanism and identity How do cosmopolitan networks come into being How do we apply cosmopolitanism theory to contemporary digital and mediated societies This comprehensive and authoritative title is a must for anyone interested in cultural consumption contemporary citizenship and identity construction It will be especially useful for students and scholars within the fields of social theory ethics identity politics cultural diversity and globalisation      *Who Should Pay?* Natasha Quadlin, Brian Powell, 2022-01-14 Americans now obtain college degrees at a higher rate than at any time in recent decades in the hopes of improving their career prospects At the same time the rising costs of an undergraduate education have increased dramatically forcing students and families to take out often unmanageable levels of student debt The cumulative amount of student debt reached nearly 1.5 trillion in 2017 and calls for student loan forgiveness have gained momentum Yet public policy to address college affordability has been mixed While some policymakers support more public funding to broaden educational access others oppose this expansion Noting that public opinion often shapes public policy sociologists Natasha Quadlin and Brian Powell examine public opinion on who should shoulder the increasing costs of higher education and why Who Should Pay draws on a decade s worth of public opinion surveys analyzing public attitudes about whether parents students or the government

should be primarily responsible for funding higher education Quadlin and Powell find that between 2010 and 2019 public opinion has shifted dramatically in favor of more government funding In 2010 Americans overwhelmingly believed that parents and students were responsible for the costs of higher education Less than a decade later the percentage of Americans who believed that federal or state local government should be the primary financial contributor has more than doubled The authors contend that the rapidity of this change may be due to the effects of the 2008 financial crisis and the growing awareness of the social and economic costs of high levels of student debt Quadlin and Powell also find increased public endorsement of shared responsibility between individuals and the government in paying for higher education The authors additionally examine attitudes on the accessibility of college for all whether higher education at public universities should be free and whether college is worth the costs Quadlin and Powell also explore why Americans hold these beliefs They identify individualistic and collectivist world views that shape public perspectives on the questions of funding accessibility and worthiness of college Those with more individualistic orientations believed parents and students should pay for college and that if students want to attend college then they should work hard and find ways to achieve their goals Those with collectivist orientations believed in a model of shared responsibility one in which the government takes a greater level of responsibility for funding education while acknowledging the social and economic barriers to obtaining a college degree for many students The authors find that these belief systems differ among socio demographic groups and that bias sometimes unconscious and sometimes deliberate regarding race and class affects responses from both individualistic and collectivist oriented participants Public opinion is typically very slow to change Yet Who Should Pay provides an illuminating account of just how quickly public opinion has shifted regarding the responsibility of paying for a college education and its implications for future generations of students
