Ralph Haeussler, 2016-06-16 Few empires had such an impact on the conquered peoples as did the Roman empire creating social economic and cultural changes that erased long standing differences in material culture languages cults rituals and identities But even Rome could not create a single unified culture Individual decisions introduced changes in material culture identity and behavior creating local cultures within the global world of the Roman empire that were neither Roman nor native The author uses Northwest Italy as an exemplary case as it went from a marginal zone to one of the most flourishing and strongly urbanized regions of Italy while developing a unique regional culture This volume will appeal to researchers interested in the Roman Empire as well as those interested in individual and cultural identity in the past **Research for**

**Social Justice** Elly Malihah, Tutin Aryanti, Vina Adriany, Hani Yulindrasari, Alicia Izharuddin, 2019-10-24 Individuals are equipped with a wide range of knowledge that enhances their employability health family life and social engagement On this basis providing equality for all has been set to be achieved as one of the United Nations sustainable development priorities However the international understandings are not only of what equality and inclusivity entail but also the social vision to achieve social justice Best practices provide a meaningful cross national discussion with respect to the following topics power relations within research social inequalities in society science research for social justice the redefinition of the notion of social justice education for social justice spatial justice the research of gender and marginalized groups the re conceptualization of the epistemological foundation of research hegemonic discourses on research science technology for social justice and welfare as well as culture and social justice This edited book aims to provide a new perspective for other benefits of research because generally the research carried out only aims to answer scientific problems and often override aspects of humanities In response to these concerns the book attempts to re map the main objectives of the research The authors in this book offer new perspectives especially in formulating the purposes of the studies they will perform Therefore this book presents a unique review of research with a variety of approaches that are coherent with the state of society in the world followed by eleven scopes of various cases from a variety of perspectives that highlight theoretical and methodological questions about research and social justice This book presents outstanding applications through multiple types of approaches that are relevant to the current context of world community issues The articles in this book will be of interest to undergraduate and graduate students as well as researchers who are interested in the social field especially research for

social justice      **Groups and Markets** Hans Gersbach,Hans Haller,2017-07-29 This monograph studies multi member households or more generally socio economic groups from a purely theoretical perspective and within a general equilibrium framework in contrast to a sizeable empirical literature The approach is based on the belief that households their composition decisions and behavior within a competitive market economy deserve thorough examination The authors set out to link the formation composition decision making and stability of households They develop general equilibrium models of pure exchange economies in which households can have several typically heterogeneous members and act as collective decision making units on the one hand and as competitive market participants on the other hand Moreover the more advanced models combine traditional exchange markets for commodities and matching markets for people or partners and develop implications for welfare social structures and economic policy In the field of family economics Hans Haller and Hans Gersbach have pioneered a market approach that applies the tools of general equilibrium theory to the analysis of household behavior This very interesting book presents an overview of their methods and results This is an inspiring work Pierre Andr Chiappori Columbia University USA The sophisticated insightful and challenging analysis presented in this book extends the theory of the multi person household along an important but relatively neglected dimension that of general equilibrium theory It also challenges GE theorists themselves to follow Paul Samuelson in taking seriously the real attributes of that fundamental building block the household as a social group whose decisions may not satisfy the standard axioms of individual choice This synthesis and extension of their earlier work by Gersbach and Haller will prove to be a seminal contribution in its field Ray Rees LMU Munich Germany      White Out Ashley W. Doane,Eduardo Bonilla-Silva,2013-01-11 What does it mean to be white This remains the question at large in the continued effort to examine how white racial identity is constructed and how systems of white privilege operate in everyday life White Out brings together the original work of leading scholars across the disciplines of sociology philosophy history and anthropology to give readers an important and cutting edge study of whiteness      **Essentials of Sociology** Leonard Broom,Philip Selznick,1979      *Handbook of Disaster Research* Havidán Rodríguez,William Donner,Joseph E.  covered in Essentials of Nursing Informatics 6th Edition **From Marx to Warner** Jacek Tittenbrun, 2018-04-18 The book  
 offers an in depth analysis of several important theories of social class and stratification both past and present This critique  
 is underpinned by a single coherent analytic framework organised around the notion of ownership This original approach  
 allows the book to offer alternative treatments of the issues dealt with by the thinkers discussed here The central argument  
 here is that there are only two classical theories of social class namely those developed by Marx and Weber and this clear  
 systematisation of the main attributes of approaches to class and stratification makes it possible to see that many theories  
 traditionally considered as class ones refer in fact to social stratification Essentials of English Grammar William Dwight

 integrating material across chapters to show the intersection of concepts Essentials of Sociology 6th Edition promotes

**Importing Faith** Glyn J. Ackerley, 2016-07-28 Many twenty first century evangelical charismatics in Britain are looking for a faith that works They want to experience the miraculous in terms of healings and Godsent financial provision Many have left the mainstream churches to join independent charismatic churches led by those who are perceived to have special insights and to teach principles that will help believers experience the miraculous But all is not rosy in this promised paradise and when people are not healed or they remain poor they are often told that it is because they did not have enough faith This study discovers the origin of the principles that are taught by some charismatic leaders Glyn Ackerley identifies them as the same ideas that are taught by the positive confession health wealth and prosperity movement originating in the United States The origins of the ideas are traced back to New Thought metaphysics and its background philosophies of subjective idealism and pragmatism These principles were imported into the UK through contact between British leaders and those influenced by American word of faith teachers Glyn Ackerley explains the persuasiveness of such teachers by examining case studies suggesting their miracles may well have social and psychological explanations rather than divine origins

**Teaching in a Globally-Connected World** Ervin F. Sparapani, Pamela L. Ross McClain, 2016-07-29 This book examines the current social political economic and religious climate of the world makes projections for the future and then makes suggestions for what the contributors believe educators need to think about in order to adequately prepare young people to successfully navigate that future We live in a globally connected world and young people as they move into the future need to be prepared to live in that future Schools and teachers tend to focus on the present which is okay however schools and teachers must decide what is important to know in the present in order for young people to be successful in the future The responsibility of education today must be to prepare learners to live in an unknown future that is global and not be so focused on an uncertain present
