Sociomaterial Design Bounding Technologies In Practice Computer Supported Cooperative Work:

Sociomaterial-Design Pernille Bjørn, Carsten Østerlund, 2014-12-01 Investigates theoretically and empirically what it means to design technological artefacts while embracing the large number of practices which practitioners engage with when handling technologies The authors discuss the fields of design and sociomateriality through their shared interests towards the basic nature of work collaboration organization technology and human agency striving to make the debates and concepts originating in each field accessible to each other and thus moving sociomateriality closer to the practical concerns of design and providing a useful analytical toolbox to information system designers and field researchers alike Sociomaterial Design Bounding Technologies in Practice takes on the challenge of redefining design practices through insights from the emerging debate on sociomateriality It does so by bringing forward a comparative examination of two longitudinal ethnographic studies of the practices within two emergency departments one in Canada and one in the United States of America A particular focus is placed upon the use of current collaborative artefacts within the emergency departments and the transformation into digital artefacts through design Sociomaterial-Design Pernille Bjørn, Carsten

Osterlund, 2014-12-31 **Designing Socially Embedded Technologies in the Real-World** Volker Wulf, Kjeld Schmidt, David Randall, 2015-07-03 This book is concerned with the associated issues between the differing paradigms of academic and organizational computing infrastructures Driven by the increasing impact Information Communication Technology ICT has on our working and social lives researchers within the Computer Supported Cooperative Work CSCW field try and find ways to situate new hardware and software in rapidly changing socio digital ecologies Adopting a design orientated research perspective researchers from the European Society for Socially Embedded Technologies EUSSET elaborate on the challenges and opportunities we face through the increasing permeation of society by ICT from commercial academic design and organizational perspectives Designing Socially Embedded Technologies in the Real World is directed at researchers industry practitioners and will be of great interest to any other societal actors who are involved with the design of IT systems *Human Work Interaction Design* Torkil Clemmensen, 2021-09-23 An approach to socio technical HCI called Human Work Interaction Design HWID emerged around 2005 It has grown steadily and now is the time for sharing this research with a wider audience In this book the HWID approach is used to discuss socio technical HCI theory cases methods and impact The book introduces HWID as a multi sided platform for theorizing about socio technical HCI work design in the digital age It presents design cases that illustrate the design of socio technical relations provides specific advice for researchers consultants and policy makers and reflects on the open issues related to theorizing about sociotechnical HCI The benefits of HWID include that it meets the requirement of taking both the social and the technical into account while focusing strongly on the relationship between the social and the technical In addition it is truly international and explicitly considers local cultural organizational and technological contexts **Business Process Management** Arik

Senderovich, Cristina Cabanillas, Irene Vanderfeesten, Hajo A. Reijers, 2025-08-30 This book constitutes the refereed proceedings of the 23rd International Conference on Business Process Management BPM 2025 which took place in Seville Spain in September 2025 The 30 full papers included in this book were carefully reviewed and selected from 132 submissions They were organized in topical sections on foundation engineering and management Designing Healthcare That Works Mark Ackerman, Michael Prilla, Christian Stary, Thomas Herrmann, Sean Goggins, 2017-11-17 Designing Healthcare That Works A Sociotechnical Approach takes up the pragmatic messy problems of designing and implementing sociotechnical solutions which integrate organizational and technical systems for the benefit of human health The book helps practitioners apply principles of sociotechnical design in healthcare and consider the adoption of new theories of change As practitioners need new processes and tools to create a more systematic alignment between technical mechanisms and social structures in healthcare the book helps readers recognize the requirements of this alignment The systematic understanding developed within the book's case studies includes new ways of designing and adopting sociotechnical systems in healthcare For example helping practitioners examine the role of exogenous factors like CMS Systems in the U S Or more globally helping practitioners consider systems external to the boundaries drawn around a particular healthcare IT system is one key to understand the design challenge Written by scholars in the realm of sociotechnical systems research the book is a valuable source for medical informatics professionals software designers and any healthcare providers who are interested in making changes in the design of the systems Encompasses case studies focusing on specific projects and covering an entire lifecycle of sociotechnical design in healthcare Provides an in depth view from established scholars in the realm of sociotechnical systems research and related domains Brings a systematic understanding that includes ways of designing and adopting sociotechnical systems in healthcare **Awakening the Management of Coworking Spaces** Ricarda B. Bouncken, 2023-01-24 In Awakening the Management of Coworking Spaces the chapter authors combine a scientific approach with managing implications developing theoretic constructs reporting qualitative and quantitative findings about challenges potentials effects managerial solutions and success stories Fieldwork for Design David Randall, Richard Harper, Mark Rouncefield, 2007-04-24 This book looks at why ethnographic approaches have been turned to in the design of computing devices for the workplace for the home and elsewhere It presents a history of ethnography both as it was practiced before computer science picked it up and since most especially in the CSCW and HCI domains It examines further the various ethnographic or fieldwork frameworks currently popular explaining and examining what each claims and entails The focus of the book throughout is on the practical relationship between theory and practice a relationship that is often misunderstood yet fundamental to successful design The book is illustrated with real examples from the authors various experiences in academic and commercial settings reporting on the use of ethnography before during and after design innovation and implementation The result is a book that provides the working knowledge necessary for using any kind of

ethnographic approach in the design of computer technologies **Designing Collaborative Systems** Andy Crabtree, 2003-05-12 An invaluable introduction to the new ethnographic approach to designing effective and user friendly collaborative and interactive systems Here designers are shown how to analyse the social circumstances in which a particular system will be used Consisting of four sections the book covers the requirements problem how to describe and analyse cooperative work the design process and how to evaluate systems supporting cooperative work Practical examples are provided throughout based on the development case of a collaborative library database system Computer Supported Cooperative Work Peter Henrik Carstensen, Kjeld Schmidt, Danmarks Tekniske Universitet. Center for Tele-Information, 1999

The Design of Computer Supported Cooperative Work and Groupware Systems Dan S. Shapiro, Michael J. Tauber, Roland Traunmüller, 1996 Hardbound The phrases the information superhighway and the the information society are on almost everyone's lips CSCW and groupware systems are the key to bringing those phrases to life To an extent that would scarcely have been imaginable a few years ago the contributions in this volume speak to each other and to a broader interdisciplinary context The areas of ethnography and design the requirements and principles of CSCW design CSCW languages and environments and the evaluation of CSCW systems are brought together to bring to light how activities in working domains are really in practice carried out The aim above all is to do justice to the creativity and versatility of those whose work they aim to support **Computer Supported Cooperative Work in Design III** Weiming Shen, Junzhou Luo, Zongkai Lin, Jean-Paul A. Barthès, Qi Hao, 2007-08-04 This book constitutes the thoroughly refereed post proceedings of the 10th International Conference on Computer Supported Cooperative Work in Design CSCWD 2006 held in Nanjing China in May 2006 Among topics covered are CSCW techniques and methods collaborative design collaborative manufacturing and enterprise collaboration Web services knowledge management security and privacy in CSCW systems workflow management and e learning **Computer Supported Cooperative Work in Design IV** Weiming Shen, Jianming Yong, Yun Yang, Jean-Paul A. Barthès, Junzhou Luo, 2008-12-18 This book constitutes the thoroughly refereed post conference proceedings of the 11th International Conference on Computer Supported Cooperative Work in Design CSCWD 2007 held in Melbourne Australia in April 2007 This book as the fourth volume of its series on Computer Supported Cooperative Work in Design includes 60 articles that are the expanded versions of the papers presented at CSCWD 2007 The book is organized in topical sections on CSCW techniques and methods collaborative design collaborative manufacturing and enterprise collaboration agents and multi agent systems Web services Semantic Web and Grid computing knowledge management security privacy and trust in CSCW systems workflow management e learning and other applications Computer Supported Cooperative Work in Design, 2002 Cooperative Systems Design Françoise Darses, 2004 A recent conference brought together researchers who contribute to the design of cooperative systems and their integration into organizational settings The aim of the conference was to advance the understanding and modeling of collaborative work situations which

are mediated by technological artefacts and to highlight the development of design methodologies for cooperative work analysis and cooperative systems design Papers from the conference reflect the multidisciplinary nature of this area representing fields such as computer and information sciences knowledge engineering distributed artificial intelligence organizational and management sciences and ergonomics There is no subject index Annotation 2004 Book News Inc Portland OR booknews com Computer Supported Cooperative Work in Design I Weiming Shen,Zongkai Lin,Jean-Paul A. Barthès,Tangqiu Li,2005-11-03 The design of complex artifacts and systems requires the cooperation of multidisciplinary design teams using multiple commercial and non commercial engineering tools such as CAD tools modeling simulation and optimization software engineering databases and knowledge based systems Individuals or individual groups of multidisciplinary design teams usually work in parallel and separately with various engineering tools which are located on different sites often for quite a long time At any moment individual members may be working on different versions of a design or viewing the design from various perspectives at different levels of detail In order to meet these requirements it is necessary to have effective and efficient collaborative design environments These environments should not only automate individual tasks in the manner of traditional computer aided engineering tools but also enable individual members to share information collaborate and coordinate their activities within the context of a design project CSCW computer supported cooperative work in design is concerned with the development of such environments Participatory Design Douglas Schuler,Aki Namioka,1993-03-01 The voices in this collection are primarily those of researchers and developers concerned with bringing knowledge of technological possibilities to bear on informed and effective system design Their efforts are distinguished from many previous writings on system development by their central and abiding reliance on direct and continuous interaction with those who are the ultimate arbiters of system adequacy namely those who will use the technology in their everyday lives and work A key issue throughout is the question of who does what to whom whose interests are at stake who initiates action and for what reason who defines the problem and who decides that there is one The papers presented follow in the footsteps of a small but growing international community of scholars and practitioners of participatory systems design Many of the original European perspectives are represented here as well as some new and distinctively American approaches The collection is characterized by a rich and diverse set of perspectives and experiences that despite their differences share a distinctive spirit and direction a more humane creative and effective relationship between those involved in technology s design and use and between technology and the human activities that motivate the technology *Cooperative Systems Design* Mireille Blay-Fornarino,2002 Annotation The main goal of the COOP conferences is to contribute to the solution of problems related to the design of cooperative systems and to the integration of these systems in organizational settings The main assumption behind the COOP conferences is that cooperative design requires a deep understanding of cooperative work in groups and organizations involving both artifacts and social practices The COOP

2002 conference is mainly devoted to the following issues the gap between virtual and material artifacts in human collaboration collaboration among mobile actors the WWW as a platform for cooperative systems and changing practices and organizations in the wake of the cooperative systems Proceedings of the Fourth European Conference on Computer-Supported Cooperative Work ECSCW '95 H. Marmolin,Y. Sundblad,K. Schmidt,1995-09-30 Computer Supported Cooperative Work CSCW is an interdisciplinary research area devoted to exploring the issues of designing computer based systems that enhance the abilities to cooperate and integrate activities in an efficient and flexible manner for people in cooperative work situations This volume is a rigorous selection of papers that represent both practical and theoretical approaches to CSCW from many leading researchers in the field As an interdisciplinary area of research CSCW brings together widely disparate research traditions and perspectives from computer human organisational and design sciences The papers selected reflect a variety of approaches and cultures in the field Audience Of interest to a wide audience because of the huge practical impact of the issues and the interdisciplinary nature of the problems and solutions proposed In particular researchers and professionals in computing sociology cognitive science human factors and system design *Interactive Artifacts and Furniture Supporting Collaborative Work and Learning* Pierre Dillenbourg,Jeffrey Huang,Mauro Cherubini,2008-12-25 The field of Computer Supported Collaborative Learning CSCL has traditionally focused on virtual learning environments and has somewhat neglected the physical environments in which students interact with each other and with their teachers However over the last years scholars have devoted growing attention to the interplay between digital and physical environments *Interactive Artifacts and Furniture Supporting Collaborative Work and Learning* reveals how these advances in computer science and human computer interaction impact CSCL environments The underlying theme of the contributions is the social affordances of physical objects i e the understanding of how technology augmented physical objects support interactions among groups in a way more intuitive or natural than traditional computers This collection of leading researchers investigates how artifacts may trigger rich interactions among groups which is a central quest for researchers in CSCL *Interactive Artifacts and Furniture Supporting Collaborative Work and Learning* illustrates a turn in the field of CSCL and emphasizes an important message for a generation of CSCL designers and researchers
