## AUTOMATIC LEVELS

### World-Proven Precision and Durability

Sokkia B series automatic levels feature enhanced reliability under all environmental conditions. Tough and compact bodies are more tightly sealed against water, humidity and dust (IPx5). The B series levels provide quick setup, easy sighting, and superior durability against vibration and shock, ensuring the increased productivity over an extra-long period of time.

#### ■ Precise, Reliable Automatic Compensation

The B-series levels incorporate the most precise and reliable compensator available in the market today. The technological superiority of the Sokkia automatic levels has been proven since the release of the best-selling B2 model in 1963. Four super-high-tensile suspension wires and magnetic clamping system ensure accuracy and stability even when exposed to temperature changes, vibrations, or shock.

#### ■ Superior Telescope

Optimally designed telescope provides exceptionally bright and sharp view that reduces operator's eye strain. Ultra-short focus distance of 200mm (7.8in.) from end of telescope makes it easiest to use in confined locations. Two-speed focus knob switches between coarse and fine for even faster operation (B20).

180mm (7.1in.) long instrument collar

#### ■ Quick Collimation

Two knobs of endless horizontal motion drives can be operated with either hand for fast and easy aiming.

#### ■ Horizontal Angle Measurement

Horizontal angles can be read in 1° or 1/4° units. Freely rotatable circle allows any angle reading from zero. Right angles can be quickly set for layout and alignment tasks. The readout window is conveniently located on the rearward base — directly below the eyepiece.

#### ■ Rapid, Easy Setup

A domed-head tripod makes setting up faster and easier even on inclined, uneven grounds. The B-series levels also fit flat-head tripods. The circular level can be seen as a pentaprism or plane mirror located beside the telescope eyepiece.
