

SCIENCE 8 SOL STUDY GUIDE

6th Grade:

- There are 8 planets that orbit (revolve) around a star (Heliocentric) called the sun in our solar system.
- In order from closest to the Sun to farthest away (My Very Educated Mother Just Served Us Noodles) : Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.
- In order from largest to smallest: Jupiter, Saturn, Uranus, Neptune, Earth, Venus, Mars, and Mercury

Label the solar system: Word Bank: Saturn, Venus, Asteroid Belt, Earth, Mars, Jupiter, Mercury, Neptune, Uranus, Inner Planets, Terrestrial Planets, Outer Planets, and Gas Giants.

- With the invention of the telescope that created observations that challenged the Geocentric model view of the solar system, Galileo was able to find more proof that the sun was at the center of the solar system (Heliocentric) and not Earth (Geocentric).
- Earth is 4.5 Billion years old
- The interaction and gravitational force of the moon and Earth cause tides.
- Seasons are caused by the tilt of earth's axis and where it is in its revolution around the sun.
- There are 8 moon phases that we see on earth.
- The moon does not emit light, when we see a moon phase, it is due to the light from the sun being reflected off the moon's surface.
- Revolve (orbit around) (365 1/4 days) and Rotate on an axis (24 hours/ day and night)
- Moons (Earth Natural Satellite) revolution around Earth takes about 1 month or 28 days.

Berube, 2008-06-01 Modern educators are currently ideologically in one of two camps those who see American education as heading in the right direction and those who fear that it has gone tragically astray For over 100 years the American educational system has been the hope of those who want to level the playing field of opportunity yet today we continue to lag behind several industrialized countries when comparing standardized science test scores Is this acceptable in the most advanced affluent country on earth Why are we not the reigning educational system on the planet And are standardized test

scores even the best way to assess the type of learning it takes to lead the world in science achievement The nature of science does not lend itself well to bubble tests yet these assessments are all we have to prove that our students are good scientists This book was born of a science teacher s frustration brought on by the standardized testing movement s reliance on high stakes tests as the sole measurement tool with which to measure achievement Science by it s very nature relies on original thinking for discovery and innovation How can this be measured by a bubble test And how do these high stakes tests affect minorities girls those with disabilities and at risk students September 11 2001 alerted us that we Americans can be less creative than our enemies an unprecedented event in American history What if changing the way we teach and assess science learning better prepares our citizens for creative preventions and solutions to world problems instead of creating citizens who have to react to world problems The nature of science begs a better way
