Due: Oct 18 at 11:00am

Points: 10

Questions: 1

## Instructions

This lab assignment will require that Mathematica software be used to solve problems involving probability, making plots for the probability distributions of discrete random variables. To prepare you for that, this introductory assignment will require writing together regular functions and probability mass functions, distribution graphs and analyzing them.

The concepts covered in this assignment and the associated lecture mainly cover what Chapter 4 of the textbook covers concerning discrete random variables. If any of these topics have not been covered to you, then I encourage that you look back at your textbook, watch the associated lecture videos, for that should assist you for the lab. I also encourage you to identify my office hours (listed in the "Course History")
