Stakeholders' Perspectives on Assessment and Improvement of Quality in Early Childhood Education and Care: A World-Wide Kaleidoscope Antonia Elisabeth Enikoe Baumeister, Hui Li, Linda Joan Harrison, 2024-08-29 The key aims of early childhood education and care (ECEC) are to offer children from all social backgrounds a good start in their lives to support parenting as well as families' workforce participation and thereby to sustainably strengthen the national economy over current and future generations. High quality ECEC has been shown to improve child outcomes and be a buffer against developmental risk factors. For these reasons, governments, ECEC providers and researchers are placing an increasing focus on the frameworks and systems that underpin quality as well as the measures that assess quality. At the same time, however, research on ECEC as a multidisciplinary endeavor has shown that the aims and benefits of high quality ECEC can only be reached when all stakeholders' needs are acknowledged and sufficiently met. For example, recent evidence suggests that the acceptability and social validity of quality assessment and improvement methods are contested among some stakeholders and thus the sustainability of these quality efforts may be in doubt. New challenges also include the ever-changing nature and circumstances affecting ECEC stakeholders, for example, the greater flows of refugee families and the impact of the Covid-19 pandemic. This Frontiers Research Topic will contribute to an updated knowledge base in order to inform governments, providers and the scientific community about best practices and new solutions for conceptualizing, measuring and improving ECEC quality. The aim of the proposed Research Topic is to generate a worldwide kaleidoscope of research studies that explore and discuss models for gathering the perspectives of multiple stakeholders and considering the meaningfulness of stakeholder views for conceptualizing, assessing and improving quality in ECEC. We believe that greater attention needs to be given to the diversity of stakeholders who are invested in ECEC, including government regulatory authorities, service providers, educators, families, communities and children. We also believe that wide-ranging stakeholder input will generate innovative methods for assessing and improving quality that keep pace with our rapidly changing information society. Two further foci are set on ECEC practices: 1) that support participation, diversity and inclusion of all children and families and 2) that are suitable for developing countries and diverse populations within countries. In this, the focus is not only on best practices but also on the limitations of practices. In soliciting research articles on ECEC stakeholder perspectives, we describe stakeholders as inclusive of government, non-government regulatory agencies, service providers, teachers and caregivers, families, communities and children. Themes of interest include, but are not limited to, Assessment of quality in ECEC including self-assessment approaches. The design of and use of quality frameworks

in ECEC Effects of quality and of quality improvement on children and families Drivers and indicators of quality improvement Acceptance and sustainability of quality efforts among ECEC stakeholders Policy expectations of quality rating and improvement systems e g funding policy The role of teacher and caregiver professionalization All types of center based and home based ECEC We are interested both in quantitative and qualitative research designs as well as in mixed methods research Cross sectional longitudinal quasi experimental and case study designs are welcome The following article types are welcome original research empirical studies systematic reviews community case studies policy briefs articles and brief research reports

Return-to-Play after Lower Limb Muscle Injury in Football Gian Nicola Bisciotti, Alessandro Corsini, Piero Volpi, 2021-10-18 Return to training RTT and return to play RTP decisions making process in football are currently based on

expert's opinion. However, there are no consensus guidelines on evidence-based decision making. This book provides a framework for evidence-based decision making both in RTT and RTP following lower limb muscle injuries sustained in football. Based on the Italian Consensus Conference 2019 on return to play after lower limb muscle injury in football, it provides a list of RTT and RTP criteria after such injuries compiled by orthopedic surgeons, sports physicians, radiologists, rehabilitation physicians, sport physiologists, general surgeons, family physicians, physiotherapists, physical trainers, and psychologists working in elite football in Italy. The book identifies the main criteria for RTT and RTP following injuries involving the most important muscle groups, i.e. quadriceps, hamstring, hip adductor, hip external rotator, iliopsoas, and soleus/gastrocnemius. As such, it is a valuable reference resource for practitioners making RTT and RTP decisions making process.
