Blackwell Ltd,1928      Bookseller's catalogues Thornton J. and son,1883      **Basic Modern Theory of Linear Complex Analytic  $q$ -Difference Equations** Jacques Sauloy,2024-11-06 The roots of the modern theories of differential and  $q$  difference equations go back in part to an article by George D Birkhoff published in 1913 dealing with the three sister theories of differential difference and  $q$  difference equations This book is about  $q$  difference equations and focuses on techniques inspired by differential equations in line with Birkhoff's work as revived over the last three decades It follows the approach of the Ramis school mixing algebraic and analytic methods While it uses some  $q$  calculus and is illustrated by  $q$  special functions these are not its main subjects After a gentle historical introduction with emphasis on mathematics and a thorough study of basic problems such as elementary  $q$  functions elementary  $q$  calculus and low order equations a detailed algebraic and analytic study of scalar equations is followed by the usual process of transforming them into systems and back again The structural algebraic and analytic properties of systems are then described using  $q$  difference modules Newton polygon filtration by the slopes The final chapters deal with Fuchsian and irregular equations and systems including their resolution classification Riemann Hilbert correspondence and Galois theory Nine appendices complete the book and aim to help the reader by providing some fundamental yet not universally taught facts There are 535 exercises of various styles and levels of difficulty The main prerequisites are general algebra and analysis as taught in the first three years of university The book will be of interest to expert and non expert researchers as well as graduate students in mathematics and physics      *"The" Athenaeum* ,1898      The Spectator ,1844 A weekly review of politics literature theology and art      The Cumulative Book Index ,1908 A world list of books in the English language      Bookseller and the Stationery Trades' Journal ,1891      *Educational Times* ,1887      **Computational Number Theory and Modern Cryptography** Song Y. Yan,2012-11-28 The only book to provide a unified view of the interplay between computational number theory and cryptography Computational number theory and modern cryptography are two of the most important and fundamental research fields in information security In this book Song Y Yang combines knowledge of these two critical fields providing a unified view of the relationships between computational number theory and cryptography The author takes an innovative approach presenting mathematical ideas first thereupon treating cryptography as an immediate application of the mathematical concepts The book also presents topics from number theory which are relevant for applications in public key cryptography as well as modern topics such as coding and lattice based cryptography for post quantum cryptography The author further covers the current research and applications for common cryptographic algorithms describing the mathematical problems behind these applications in a manner accessible to computer scientists and engineers Makes mathematical problems accessible to computer scientists and engineers by showing their immediate application Presents topics from number theory relevant for public key cryptography applications Covers modern topics such as coding and lattice

based cryptography for post quantum cryptography Starts with the basics then goes into applications and areas of active research Geared at a global audience classroom tested in North America Europe and Asia Includes exercises in every chapter Instructor resources available on the book's Companion Website Computational Number Theory and Modern Cryptography is ideal for graduate and advanced undergraduate students in computer science communications engineering cryptography and mathematics Computer scientists practicing cryptographers and other professionals involved in various security schemes will also find this book to be a helpful reference     The Journal of Education ,1893     **Athenaeum** ,1845     The United States Catalog Mary Burnham,Carol Hurd,1928     *The Athenæum* ,1845     **The Examiner** ,1845     **Resources in Education** ,1990     Books in Print ,1994     **The Bookseller** ,1888     **the educational times** ,1882     **Calendar of the University of Sydney** University of Sydney,1903     **The works' managers' hand-book of modern rules, tables, and data for civil and mechanical engineers ... etc** Walter S.
