Teaching English as a Foreign Language, 1936-1961: Selected papers Richard C. Smith, 2005 This set includes the works of neglected theorists such as Horace Wyatt and Michael West This set complements English as a Foreign Language Teaching 1912 1936 Pioneers of ELT A History of ELT, Second Edition A.P.R. Howatt, H.G. Widdowson, 2004-06-03

Providing an introduction this work contains sections on the British Empire Approaches and Methods in Language Teaching Jack C. Richards, Theodore S. Rodgers, 2014-04-16 In addition this third edition includes content on the teaching and learning environment with chapters on learners and methods teachers and methods plus approaches methods and the curriculum **What is the Matter with Communicative Competence?** Reinhold Peterwagner, 2005 This book integrates recent findings of linguistic research into ELT Its aim is to introduce future teachers to the complex concept of communicative competence to critically analyse learners teaching learning deficiencies in the light of the requirements they are expected to meet at the school leaving exams or at university entry to offer suggestions about how to remedy these shortcomings and also to provide teaching and testing materials *English Dictionaries for Foreign Learners* Anthony Paul Cowie, 2002 This is the first history of dictionaries of English for foreign learners from their origins in Japan and East Asia in the 1920s to the computerized compilations of the present Monolingual dictionaries for foreign speakers were a revolutionary development at their outset and now represent a coming together of intellectual technological and commercial forces almost unequalled in book publishing As the author shows the early history of EFL dictionaries was research driven arising directly from research in linguistic theory and language pedagogy now it is user driven determined by what users require or are thought to require The pioneering dictionaries were the work of individuals Current dictionaries are the products of huge databases manipulated by sophisticated processing as publishers strive to share an immense and ever growing global market The book has both a thematic and a chronological structure Three chapters describe the historical sequence over a period of some sixty years These alternate with chapters dealing with phraseology computers and corpus linguistics and research into dictionary users and uses three subjects central to the development of ELT dictionaries over the last thirty years Anthony Cowie examines the way in which availability of massive computing power has transformed the recording and analysis of current speech and shows how the growth of research into the users and uses of dictionaries has led to developments both in ELT lexicography and method This readable and non technical account is directed at professionals in applied linguistics and English language teaching and at lexicographers but it will fascinate everyone concerned with the analysis of English and faced with the challenge of recording the subtleties of its grammar and meaning
