The Use of Pop Songs in the EFL Classroom Ornerová Lenka, 2011-03-09 Inhaltsangabe Introduction I have chosen the topic of using pop songs in the EFL classroom because I strongly believe that working with pop songs is a highly motivational device When I was a student at a lower and upper secondary school listening to songs in English classes was my favourite activity I have always wanted to be able to understand the lyrics of songs I listened to Later I realized that I have learned a lot from listening to pop songs and analyzing their lyrics Therefore in my diploma project I would like to prove that using pop songs is a highly motivational device in teaching English with instructional value and that students enjoy working with pop songs The theoretical part of this diploma project is based on relevant sources of background literature In the first two chapters the use of songs is described with regard to motivation and the Multiple Intelligences Theory The third and fourth chapter deal with the reasons for using songs and their classification In the last two chapters of the theoretical part pedagogical principles of using pop songs in class as well as the pros and cons of teaching through pop songs are presented The practical part is based on the findings of three surveys I have conducted in the field of using songs in the EFL classroom In the first part of the research I present an analysis of questionnaires which I distributed among English teachers at lower and upper secondary schools and grammar schools In the second part of the research I describe students' attitudes to pop song based lessons which I taught during my teaching practice at grammar schools In the third part of the research I analyze the types of songs presented in commonly used textbooks at lower and upper secondary schools In addition I present a self developed teaching material containing a list of pop songs suitable for the EFL classroom In the last part of the practical part I answer the research questions and provide some implications for my own teaching Inhaltsverzeichnis Table of Contents ABBREVIATIONS AND DEFINITIONS ABSTRACT INTRODUCTION9 THEORETICAL PART 1 MOTIVATION10 1 1Definition of motivation10 1 2Different kinds of motivation11 1 3Motivation in second language acquisition learning vs foreign language learning12 1 4Sources of motivation in the EFL classroom14 2 MULTIPLE INTELLIGENCES16 2 1The categories of intelligence17 2 2The implications of MI theory for ELT19 2 3Musical

Creating an Environment for Successful Projects, 3rd Edition Randall Englund, Robert J. Graham, 2019-10-01

Now in its third edition this project management classic has been updated with an array of field tested tools to help upper management ensure the success of projects within organizations For over twenty years *Creating an Environment for Successful Projects* has been a staple for upper managers who want to help projects succeed This new edition includes case studies from companies that have successfully applied the approach along with practical tools such as templates surveys and benchmark reports for savvy leaders who want to ensure project success throughout their organizations The insights in this book will help management speed projects along instead of getting in their way All too often well intentioned managers put roadblocks in the team's way instead of empowering them with the tools they need to succeed This approach to project environments grounded in decades of research and practice will help you make your organization the most project friendly it's ever been Organizational changes rarely work unless upper management is heavily involved Although project managers are most closely responsible for the success of projects upper managers are the ones who ultimately create an environment that supports those projects The way upper managers define structure and act toward projects has an important effect on the success or failure of those projects and consequently the success or failure of the organization This book helps all managers understand the need for project management changes and shows how to develop project management as an organizational practice

How can the use of frequency information from corpora be used in foreign language teaching? A corpus-based study on vocabulary in course books Karin Dietiova, 2019-02-27 Diploma Thesis from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade A course Anglistica language English abstract

How can corpora be used to improve vocabulary learning in language acquisition This thesis focuses on the use of word frequencies by teachers of English Teaching vocabulary to young learners is one of the most challenging responsibilities that teachers face The methodology chosen for the presentation of vocabulary is crucial for the learning success of the students There is a great amount of studies on how computers can facilitate the learning of English as a foreign language EFL and with the development of immense corpora both teachers and students now have access to hundreds of millions of words and the possibility to explore their occurrence patterns This advantage is however rarely used in practice partly due to the relatively short existence of this discipline but most importantly due to the lack of information about corpora in English language teaching ELT This paper will present the concept of course book vocabulary and present word frequencies in learner's dictionaries The research part of this thesis deals with a linguistic analysis of data extracted from course books and their comparison with the Oxford list of 3000 essential words The aim of the thesis is to investigate the linguistic attributes of texts forming course books and to examine their relation
