Cheng, 2020-05-27 This book brings together perspectives of development economics and law to tackle the relationship between competition law enforcement and economic development It addresses the question of whether and how competition law enforcement helps to promote economic growth and development This question is highly pertinent for developing countries largely because many developing countries have only adopted competition law in recent years about thirty jurisdictions had in place a competition law in the early 1980s and there are now more than 130 competition law regimes across the world of which many are developing countries The book proposes a customized approach to competition law enforcement for developing countries set against the background of the academic and policy debate concerning convergence of competition law The implicit premise of convergence is that there may exist one or a few correct approaches to competition law enforcement which in most cases emanate from developed jurisdictions that are applicable to all This book rejects this assumption and argues that developing countries ought to tailor competition law enforcement to their own economic and political circumstances In particular it suggests how competition law enforcement can better incorporate development concerns without causing undue dilution of its traditional focus on protecting consumer welfare It proposes ways in which approaches to competition law enforcement need to be adjusted to reflect the special economic characteristics of developing country economies and the more limited enforcement capacity of developing country competition authorities Finally it also addresses the long running debate concerning the desirability and viability of industrial policy for developing countries The author would like to acknowledge the Research Grants Council of Hong Kong for its generous support The work in this book was fully supported by a grant from the Research Grants Council of Hong Kong Project No HKU 742412H **Wealth Creation and Poverty Reduction: Breakthroughs in Research and Practice** Management Association, Information Resources, 2019-12-06 One of the major tools of attaining proper development all around the world is creating wealth and economic inclusion such that all classes of people can secure their lifestyles through access to financial services from formal sectors Expanding access to resources and increasing self employment opportunities help reduce poverty and improve social development *Wealth Creation and Poverty Reduction Breakthroughs in Research and Practice* examines trends challenges issues and strategies related to the creation of livelihood options through the redistribution of resources foreign aid private sector activities and other methods Highlighting a range of topics such as microfinance poverty alleviation and socio economic development this publication is an ideal reference source for government officials policymakers executives economists analysts researchers academicians professionals and students interested in wealth creation in areas of extreme poverty **Domination and Subordination as a Social Organization Principle in Georg Simmel's Soziologie** Adele Bianco, 2014-07-16 Analyzing Georg Simmel's theory of domination and

subordination as presented in his *Soziologie* 1908 Adele Bianco focuses on concrete case studies to derive an interpretation of globalization processes Within sociology domination and subordination are reciprocal They represent constitutive modes of associated living based on a hierarchical structure Domination and subordination reflect social configurations but are very controversial categories Sometimes perceived as a justification of the status quo they also run the risk of legitimizing the perpetuation of inequalities In truth they are tools to help us understand social order and identify inequalities regulating structures Domination and Subordination as a Social Organization Principle in Georg Simmel s *Soziologie* begins by defining the relationship between domination and subordination at the micro level the relationship among subjects Then after discussing the macro level Bianco employs a variety of case studies to expose the intricacies of Simmel s domination and subordination theory The ensuing discussions of democracy employment relationships social relationships and globalization answer such questions as Why is society divided between a top and a bottom What does it mean to wield authority What degrees of power are held by those in a position of inferiority Why is the strong subject ultimately in need of the weak subject What can be said of a majority winning in a democracy and what is the minority left with How can the social condition of the modern worker be reconciled with his proclaimed freedom and What does subordination to the employer effectively comprise Scholars and students of sociology social theory labor studies and psychology will benefit from this book s combination of intricate theories and real world case studies towards a comprehensive theory of modern globalization **Heterodox**
