For Your Information Philip Tetlow,2024-08-12 In recent times physicists have come to appreciate information s central role in the universe s grand plan That and the fact that an explicit understanding of the informational relationships involved may well be key to unlocking many of the universe s deepest secrets That makes the birth of both Computer and Information Science not only essential to the explosion of modern technological success but also to our understanding of reality itself In recognizing that what unfolds is a story not only about Alan Turing and his pioneering colleagues but also great thinkers like Albert Einstein Michael Faraday Ludwig Wittgenstein and others It therefore pulls in much of modern history and touches on seminal events like the birth of the atomic bomb It also hints at the reasons behind the various social

and political divides we see in the world today So in many ways the story of how we became more informed about information is also the story of the modern age What you will read of here is the role that information plays in that ongoing saga and many of the twists and turns that have brought us to where we are with information today In it you will learn that unbeknown to Turing and others their work would not only help overthrow the Nazis and thaw the chilling atmosphere of the Cold War to come but also echo down the ages to remain relevant in a conflict still raging today That sees the Computer and Information Scientists at loggerheads as they fight to find a right and justifiable place for meaning in information s definition About The Open Group Press The Open Group Press is an imprint of The Open Group for advancing knowledge of information technology by publishing works from individual authors within The Open Group membership that are relevant to advancing The Open Group mission of Boundaryless Information Flow™ The key focus of The Open Group Press is to publish high quality monographs as well as introductory technology books intended for the general public and act as a complement to The Open Group standards guides and white papers The views and opinions expressed in this book are those of the authors and do not necessarily reflect the consensus position of The Open Group members or staff

Ecosystems Architecture Philip Tetlow, Neal Fishman, Paul Homan, Rahul, 1970-01-01 Today modern business is adrift in a sea of connectivity and potential Where once an organization s IT needs could be met from within its four walls we now see many mission critical systems reaching out beyond an enterprise s traditional boundaries This is pushing solutions design well beyond the comfort zone of Enterprise Architecture and out into a world of hyper enterprise systems This is a world of complexity and scale where the changing status quo demands that organizations keep up or die To survive their IT systems must also evolve as the context of their environment s ebbs and flows The result is a dynamic interconnected web of critical business advantage balanced against uncertainty and risk and infused with AI This is the world of Ecosystems Architecture This book will introduce you to the challenges of designing hyper enterprise IT systems and the tools you will need as the era of Ecosystems Architecture dawns It explains the proximity of new thinking to long held architectural tenets and outlines how and why thinking has moved on It also reviews existing frameworks and explains how and why they fit into the broader landscape of architectural thinking About The Open Group Press The Open Group Press is an imprint of The Open Group for advancing knowledge of information technology by publishing works from individual authors within The Open Group membership that are relevant to advancing The Open Group mission of Boundaryless Information Flow™ The key focus of The Open Group Press is to publish high quality monographs as well as introductory technology books intended for the general public and act as a complement to The Open Group Standards Guides and White Papers The views and opinions expressed in this book are those of the authors and do not necessarily reflect the consensus position of The Open Group members or staff
