Smith,Rachelle Taylor,2016-04-29 Peter Philips c 1560 1628 was an English organist composer priest and spy He was embroiled in multifarious intersecting musical social religious and political networks linking him with some of the key international players in these spheres Despite the undeniable quality of his music Philips does not fit easily into an overarching progressive view of music history in which developments taking place in centres judged by historians to be of importance are given precedence over developments elsewhere which are dismissed as peripheral These principal loci of musical development are given prominence over secondary ones because of their perceived significance in terms of later music However a consideration of the networks in which Philips was involved suggests that he was anything but at the periphery of the musical cultural religious and political life of his day In this book Philips s life and music serve as a touchstone for a discussion of various kinds of network in the late sixteenth and early seventeenth centuries The study of networks enriches our appreciation and understanding of musicians and the context in

which they worked The wider implication of this approach is a constructive challenge to orthodox historiographies of Western art music in the Early Modern Period

Interpreting Historical Keyboard Music Andrew Woolley, John Kitchen, 2016-05-23 Research in the field of keyboard studies especially when intimately connected with issues of performance is often concerned with the immediate working environments and practices of musicians of the past An important pedagogical tool the keyboard has served as the workbench of countless musicians over the centuries In the process it has shaped the ways in which many historical musicians achieved their aspirations and went about meeting creative challenges In recent decades interest has turned towards a contextualized understanding of creative processes in music and keyboard studies appears well placed to contribute to the exploration of this wider concern The nineteen essays collected here encompass the range of research in the field bringing together contributions from performers organologists and music historians Questions relevant to issues of creative practice in various historical contexts and of interpretative issues faced today form a guiding thread Its scope is wide ranging with contributions covering the mid sixteenth to early twentieth century It is also inclusive encompassing the diverse range of approaches to the field of contemporary keyboard studies Collectively the essays form a survey of the ways in which the study of keyboard performance can enrich our understanding of musical life in a given period

Studies on Authorship in Historical Keyboard Music Andrew Woolley, 2023-10-31 Authorship is a pertinent issue for historical musicology and musicians more widely and some controversies concerned with major figures have even reached wider consciousness Scholars have clarified some of the issues at stake in recent decades such as the places of borrowing and arranging in the creative process and the wider cultural significance of these practices The discovery of new sources and methodologies has also opened up opportunities for reassessing specific authorship problems Drawing upon this wider musicological literature as well as insights from other disciplines such as intellectual history and book history this book aims to build on what has already been achieved by focussing on keyboard music The nine chapters cover case studies of authorship problems the socioeconomic conditions of music publishing the contributions of composers arrangers copyists and music publishers in creating notated keyboard compositions the functions of attribution and ascription and how the contexts in which notated pieces were used affected concepts of authorship at different times and places
