Achieving sustainable production of poultry meat Volume 2 Todd Applegate, 2017-07-31 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030 Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems However more intensive systems have increased the risk of transmission of animal diseases and zoonoses Consumer expectations of sensory and nutritional quality have never been higher At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare Drawing on an international range of expertise this book reviews research on poultry breeding and nutrition The first part of the book reviews how advances in genetics have impacted developments in breeding Part 2 discusses ways of optimising poultry nutrition to ensure quality and sustainability in poultry meat production Chapters review the use of feedstuffs and ingredients such as amino acids enzymes and probiotics as well as feed formulation and safety **Achieving sustainable production of poultry meat Volume 2** Breeding and nutrition will be a standard reference for poultry and food scientists in universities government and other research centres and companies involved in poultry production It is accompanied by two further volumes which review safety quality and sustainability as well as poultry health and welfare

Achieving sustainable production of poultry meat Volume 2 Professor Todd J. Applegate, 2017-07-31 Reviews advances in poultry genetics and their application in marker assisted breeding Summarises recent research on poultry digestion and nutritional requirements Discusses current studies on optimising the role of dietary components such as enzymes minerals and probiotics

The Ethics of Eating Animals Bob Fischer, 2019-09-05 Intensive animal agriculture wrongs many many animals Philosophers have argued on this basis that most people in wealthy Western contexts are morally obligated to avoid animal products This book explains why the author thinks that's mistaken He reaches this negative conclusion by contending that the major arguments for veganism fail they don't establish the right sort of connection between producing and eating animal based foods Moreover if they didn't have this problem then they would have other ones we wouldn't be obliged to abstain from all animal products but to eat strange things instead e.g. roadkill insects and things left in dumpsters On his view although we have a collective obligation not to farm animals there is no specific diet that most individuals ought to have Nevertheless he does think that some people are obligated to be vegans but that's because they've joined a movement or formed a practical identity that requires that sacrifice This book argues that there are good reasons to make such a move albeit not ones strong enough to show that everyone must do likewise
