Abiding Where God Abides Barika Kinanee, 2020-05-17 Have you been thirsty and hungry for more Are you dissatisfied with the norm Then you might need a discovery No one who discovers where He abides remains the same Discovery is the base upon which men who affect generations with unquestionable results emerge Your personal discovery is your unique strength The patriarch Abraham found something that made him a generational father Faith What have you found Have you found the secret place The best place to find a Person is not their office but their home This also applies to God God has a home In this volume you will discover where God lives and perhaps you will decide to take accommodation with Him afterward Hopefully you do I am sure He is waiting for you to abide where He abides No one abides where God abides and ends up anything less of God Remember the company you keep determines what accompanies you You can keep company with God

Jesus Becoming Jesus, Volume 3 Thomas G. Weinandy, 2022-09-28 *Jesus Becoming Jesus Volume 3* follows upon the previous two volumes of this series entitled *Jesus Becoming Jesus Volume 1* was a theological interpretation of the Gospels of Matthew Mark and Luke and volume 2 was a theological interpretation of the Prologue and Book of Signs of John's Gospel chapters 1-12 Unlike many conventional biblical commentaries Weinandy concentrates on the theological content contained within John's Gospel This is accomplished through a close reading of John's Gospel theologically interpreting each chapter of the Gospel sequentially In so doing he also takes into account the Johannine corpus as a whole He also relates John's Gospel to relevant material found within the Synoptic Gospels the Pauline Corpus and other New Testament writings In this present volume Weinandy's original theological interpretation focuses first on the Evangelist's

narrative of the Last Supper which includes Jesus washing of his disciples feet followed upon his lengthy farewell address and his ensuing High Priestly Prayer chapter 13 17 Although Jesus speaks of his leaving his disciples yet their hearts should not be troubled for he is going to prepare a place for them in his Father's house and he will also send them another Counselor the Holy Spirit The Holy Spirit will not only convict the world sin but he will also empower the disciples to profess their faith in Jesus as the Father's Son even in the midst of persecution All that Jesus tells his disciple in his final discourse he then prays that his Father will accomplish through his forthcoming death and resurrection above all that his disciples will share in the same oneness of love that he and his Father possess Weinandy masterfully treats John's Passion and Resurrection Narratives He not only theologically interprets the uniqueness of the Evangelist's narratives but also how his narratives intersect with the Synoptic accounts Moreover Weinandy's theological reading of Jesus crucifixion and resurrection weaves together John's soteriology ecclesiology and sacramentality all of which are founded upon the Incarnation that Jesus is the Father's Spirit filled incarnate Son As the title suggests Jesus being named Jesus in his death and resurrection definitively enacts his name and so becoming who he is YHWH Saves

Partial Differential Relations Misha Gromov, 2013-03-14 The classical theory of partial differential equations is rooted in physics where equations are assumed to describe the laws of nature Law abiding functions which satisfy such an equation are very rare in the space of all admissible functions regardless of a particular topology in a function space Moreover some additional like initial or boundary conditions often insure the uniqueness of solutions The existence of these is usually established with some apriori estimates which locate a possible solution in a given function space We deal in this book with a completely different class of partial differential equations and more general relations which arise in differential geometry rather than in physics Our equations are for the most part undetermined or at least behave like those and their solutions are rather dense in spaces of functions We solve and classify solutions of these equations by means of direct and not so direct geometric constructions Our exposition is elementary and the proofs of the basic results are selfcontained However there is a number of examples and exercises of variable difficulty where the treatment of a particular equation requires a certain knowledge of pertinent facts in the surrounding field The techniques we employ though quite general do not cover all geometrically interesting equations The border of the unexplored territory is marked by a number of open questions throughout the book
