Airpower in Small Wars James S. Corum,Wray R. Johnson,2003 The use of airpower in wartime calls to mind the massive bombings of World War II but airplanes have long been instrumental in small wars as well Ever since its use by the French to put down rebellious Moroccan tribes in 1913 airpower has been employed to fight in limited but often lengthy small conflicts around the globe This is the first comprehensive history of airpower in small wars conflicts pitting states against non state groups such as insurgents bandits factions and terrorists tracing it from the early years of the twentieth century to the present day It examines dozens of conflicts with strikingly different scenarios the Greek Civil War the Philippine Anti Huk campaign French and British colonial wars the war in South Vietnam before the American escalation counterinsurgency in southern Africa Latin American counter guerrilla operations and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades For each war the authors describe the strategies employed on both sides of the conflict the air forces engaged and the specific airpower tactics employed They discuss the ground campaigns and provide the political background necessary to understand the air campaigns and in each case they judge the utility of airpower in its broadest sense In their historic sweep they show how forms of airpower evolved from planes to police helicopters aircraft of the civilian air reserve and today s unmanned aircraft They also disclose how small wars after World War II required new strategies operational solutions and tactics By taking this broad view of small war airpower the authors are able to make assessments about the most effective and least effective means of employing airpower They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small wars training programs Airpower in Small Wars will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in

Warping Time

Benjamin Ginsberg,Jennifer Bachner,2023-04-11 Warping Time shows how narratives of the past influence what people believe about the present and future state of the world In Benjamin Ginsberg and Jennifer Bachner s simple experiments in which the authors measured the impact of different stories their subjects heard about the past these history lessons moved contemporary policy preferences by an average of 16 percentage points forecasts of the future moved contemporary policy preferences by an average of 12 percentage points the two together moved preferences an average of 21 percentage points And in an Orwellian twist the authors estimate that the history lessons had an average erasure effect of 8.5 percentage points the difference between those with long held preferences and those who did not recall that they previously held other opinions before participating in the experiment The fact that the past present and future are subject to human manipulation suggests that history is not simply the product of impersonal forces material conditions or past choices Humans are the architects of history not its captives Political reality is tenuous Changes in our understanding of the past or future can substantially alter perceptions of and action in the present Finally the manipulation of time especially the relationship between past and future is a powerful political tool
