Shapiro,2023-05-23 Unsettling absolutely riveting and for better or worse necessary reading Brian Christian author of Algorithms to Live By and The Alignment Problem An entertaining account of the philosophy and technology of hacking and why we all need to understand it It s a signal paradox of our times that we live in an information society but do not know how it works And without understanding how our information is stored used and protected we are vulnerable to having it exploited In Fancy Bear Goes Phishing Scott J Shapiro draws on his popular Yale University class about hacking to expose the secrets of the digital age With lucidity and wit he establishes that cybercrime has less to do with defective programming than with the faulty wiring of our psyches and society And because hacking is a human interest story he tells the fascinating tales of perpetrators including Robert Morris Jr the graduate student who accidentally crashed the internet in the 1980s and the Bulgarian Dark Avenger who invented the first mutating computer virus engine We also meet a sixteen year old from South Boston who took control of Paris Hilton s cell phone the Russian intelligence officers who sought to take control of a US election and others In telling their stories Shapiro exposes the hackers tool kits and gives fresh answers to vital questions Why is the internet so vulnerable What can we do in response Combining the philosophical adventure of G del Escher Bach with dramatic true crime narrative the result is a lively and original account of the future of hacking espionage and war and of how to live in an era of cybercrime Includes black and white images **Computer**

Government must do more to help the public understand how to stay safe online. It calls for a prolonged awareness raising campaign to increase public understanding of personal online security. Eighty per cent of protection against cyber attack is routine IT hygiene yet currently there is no single first point of advice and help for consumers and much of the online information about internet security is often technical or jargon filled. Television exposure is crucial to gain the widest possible exposure to the safety message and more should be done to promote and resource the existing Government website Get Safe Online. Advice from Get Safe Online should be provided with every device capable of accessing the internet and all Government websites should link to the website and highlight the latest security updates. The provision of Government services by the digital by default policy will increasingly require those in receipt of Government benefits and services to access these online. The Committee raises concerns that the scheme will be of greater use in protecting the Government against welfare fraud than the individual user against crime. The Government should investigate the potential for imposing statutory safety standards if the industry cannot demonstrate that voluntary self regulation can improve security.

PC Viruses Alan Solomon,2012-12-06 PC viruses are not necessarily a major disaster despite what is sometimes written about them But a virus infection is at the very least a nuisance and potentially can lead to loss of data Quite often it is the user s panic reaction to discovering a virus infection that does more than the virus itself This book demystifies PC viruses providing clear accurate information about this relatively new PC problem It enables managers and PC users to formulate an appropriate response adequate for prevention and cure but not over the top Over 100 PC viruses and variants are documented in detail You are told how to recognise each one what it does how it copies itself and how to get rid of it Other useful and relevant technical information is also provided Strategies for dealing with potential and actual virus outbreaks are described for business academic and other environments with the emphasis on sensible but not unreasonable precautions All users of IBM PC or compatible computers from single machines to major LAN s will find this book invaluable All that is required is a working knowledge of DOS Dr Alan Solomon has been conducting primary research into PC viruses since they first appeared and has developed the best selling virus protection software Dr Solomon s Anti Virus Toolkit **The Melissa Virus** United States.
