

The Impact of Doing Nothing

When considering the failing health of children in our population, the potential impact on society and our shared quality of life goes beyond just what happens to a segment of our youth.

Lack of Productivity

Firstly, the kids who fall sick themselves will be devastated. To be 17 and diagnosed with diabetes, to contract heart disease at 24, or even get a heart attack at 28, should be a shocking prospect for us all. These children will either not join the workforce for a very long time, or not at all due to health complications. These are earners and taxpayers who are producing only a fraction of what their healthier versions.

Strain on Healthcare Services

For every annual budget that is tabled, the healthcare budget is the most significant of them all dwarfing even police services and education by billions. We are often looking for ways to train and hire new nurses, doctors, physicians and administrative staff to support hospitals and medical facilities. We are already constantly trying to catch up to the rising demand for health professionals, and now we are looking at an increasingly unhealthy population. Anyone can see the issue that is clear here, the need for larger and larger health-care budgets to address the population's deteriorating health, which means drawing funding from other crucial sectors. If we could help produce a healthier population, we would be in a unique position to start decreasing our health-care expenditures and contribute to others.

Neglected Population Segments

Our ability to treat people within the healthcare setting is determined by limited resources (financial, people, facilities, etc.). When today's young people grow older and introduce their ailments to our system, resources to manage their issues will take away from other existing segments. Seniors will be further underserved, individuals dealing with long-term chronic illnesses, or various diseases and cancers will be underserved, and the growing mental health issues will also be neglected, just to make way for a generation of young, sickly people. When the healthcare system suddenly begins to fail various groups of people (even by 5%), there is ripple effect which can cost an estimated 120 billion dollars annually.

It is clear that the costs of unhealthy young people who will only worsen as they get older would be a highly costly situation for us. That is why we have a very straightforward, easy to implement plan to ensure a potentially frightening prospect is nipped in the bud.

Pre-budget 2005 Great Britain. Parliament. House of Commons. Environmental Audit Committee, 2006 The Committee reports on the progress made by the Treasury in placing environmental objectives at the heart of its fiscal policies This year's pre Budget report Cm 6701 December 2005 ISBN 0101670125 is found to be inadequate especially in the context of UK CO2 emissions actually increasing once more No significant new measures were announced and the Committee sees a continued slowing down of the Treasury's momentum in turning rhetoric into action It believes the Treasury should redefine Air Passenger Duty APD as an environmental tax and that APD rates should more accurately reflect the carbon emissions of the flights to which they apply Charging APD on flights rather than passengers could also act as an incentive to more efficient use of aviation fuel The Committee also recommends action on aviation fuel duty biofuels car energy efficiency steps to wean the economy off over reliance on oil stamp duty and council tax reductions for homes built or refurbished to high environmental standards Each pre Budget report should include figures on total revenue from the climate change levy aggregates levy and landfill tax Although the Treasury accepts the principle of increasing taxes on bads rather than goods its

reluctance for bold reform of the tax system mystifies the Committee A Green tax Commission should be reconsidered to develop a proper communications strategy to sell the environmental programme to the public The Committee exhorts the Government to make moves on the climate change problem as waiting for universal agreement is a recipe for stasis Finally the Committee regrets the Treasury's decision to abolish the Operating and Financial Review required from large companies in that it appears to view sustainable reporting as an optional extra It hopes that the proposed new business reviews will continue to require some form of social and environmental disclosure from companies *House & Garden*, 1918

Australia's American Alliance Peter Dean, Stephan Frühling, Brendan Taylor, 2016-11-14 This book is specifically designed as a companion volume to Australia's Defence Towards a New Era The Australia United States Alliance has been critical to Australian foreign and defence policy since the ANZUS Treaty was signed in 1951 For 63 years it has been an enduring feature of Australian defence planning yet the contemporary alliance is arguably in one of the more important phases of reinterpretation in its long history While the Alliance by its very nature is a bi lateral relationship this book will therefore specifically focus on Australian perspectives and policy choices while providing context on the role of the United States in the Asia Pacific and its position as a global power Intra-Africa Migrations Inocent Moyo, Jussi P.

Laine, Christopher Changwe Nshimbi, 2021-02-21 This book discusses regional and continental integration in Africa by examining the management of migration across the continent It examines borders and securitisation of migration and the challenges and opportunities that arise out of reconfigured continental demographics The book offers insights on intra Africa migrations and highlights how intra continental migration creates socio economic and cultural borders It explores how these borders beyond the physical boundaries of states including the Berlin Conference constructed borders create cultural divides challenges for economic integration and cross border security and irregular migration patterns While the movement of economic goods is valued for regional economic integration the mobility of people is seen as a threat This approach to migration contradicts the intentions of true integration and development and triggers negative responses such as xenophobia that cannot be addressed by simply managing the physical border and allowing free movement This book engages in a pivotal discussion of these issues which are hitherto missing in African border studies by demonstrating the ubiquity and overreaching influence of various kinds of borders on the African continent With multidisciplinary contributions that provide an in depth understanding of intra Africa migrations and strategies for enhanced migration management this book will be a useful resource for scholars and students studying geography politics security studies development studies African studies and sociology
