Credit and Power Simon Sherratt, 2020-10-27 This book reveals the surprising role that credit money created ex nihilo by financiers played in raising the British government s war loans between 1793 and 1815 Using often overlooked contemporary

objections to the National Debt a startling paradox is revealed as it is shown how the government's ostensible creditors had in fact very little real money to lend and were instead often reliant for their own solvency upon the very government they were lending to. By following the careers of unsuccessful loan contractors who went bankrupt lending to the government to the triumphant career of the House of Rothschild who successfully exported the British system of war financing abroad with the coming of peace the symbiotic relationship that existed between the British government and their ostensible creditors is revealed. Also highlighted is the power granted to the technically bankrupt Bank of England over credit and the money supply an unprecedented and highly influential development that filled many contemporaries with horror. This is a tale of bankruptcy stock market manipulation bribery and institutional corruption that continues to exert its influence today and will be of interest to anyone interested in government financing debt and the origins of modern finance

Ecolinguistics Arran Stibbe, 2015-05-01 The increasingly rapid destruction of the ecological systems that support life is calling into question some of the fundamental stories that we live by: stories of unlimited economic growth, of consumerism, progress, individualism, success and the human domination of nature. Ecolinguistics shows how linguistic analysis can help reveal the stories we live by, open them up to question and contribute to the search for new stories. Bringing together the latest ecolinguistic studies with new theoretical insights and practical analyses, this book charts a new course for ecolinguistics as an engaged form of critical enquiry. Featuring a framework for understanding the theory of ecolinguistics and applying it practically in real life, exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku, a comprehensive glossary giving concise descriptions of the linguistic terms used in the book, discourse analysis of a wide range of texts including newspapers, magazines, advertisements, films, nonfiction books and visual images.
