Resources in Education, 2001-04 **Sweet Taste of Liberty** W. Caleb McDaniel, 2019-08-07 Winner of the Pulitzer Prize for History The unforgettable saga of one enslaved woman's fight for justice and reparations Born into slavery Henrietta Wood was taken to Cincinnati and legally freed in 1848 In 1853 a Kentucky deputy sheriff named Zebulon Ward

colluded with Wood's employer abducted her and sold her back into bondage. She remained enslaved throughout the Civil War, giving birth to a son in Mississippi and never forgetting who had put her in this position. By 1869, Wood had obtained her freedom for a second time and returned to Cincinnati where she sued Ward for damages. In 1870, astonishingly after eight years of litigation, Wood won her case. In 1878, a Federal jury awarded her \$2,500. The decision stuck on appeal. More important than the amount, though the largest ever awarded by an American court in restitution for slavery, was the fact that any money was awarded at all. By the time the case was decided, Ward had become a wealthy businessman and a pioneer of convict leasing in the South. Wood's son later became a prominent Chicago lawyer and she went on to live until 1912. McDaniel's book is an epic tale of a black woman who survived slavery twice and who achieved more than merely a moral victory over one of her oppressors. Above all, *Sweet Taste of Liberty* is a portrait of an extraordinary individual as well as a searing reminder of the lessons of her story which establish beyond question the connections between slavery and the prison system that rose in its place.

Autistics at Work Sandra Thom-Jones, 2025-09-16 Sandra Thom Jones has tried all kinds of work: selling flowers, tending bar, office work, university leadership. Along the way, she has made some mistakes, had some successes, and learnt a lot about the barriers and facilitators for autistic people building a career in a predominantly neurotypical work environment. Thom Jones shares her personal experiences and reflections, as well as those of her colleagues, providing insights into the challenges and benefits of both being and working with an autistic employee, co-worker, and employer. *Autistics at Work* is also informed by two decades of study into the autistic experience and covers all aspects of the employment journey, from entering the workforce to senior leadership. *Autistics at Work* is essential reading for autistic individuals who are in or considering entering the workforce. It is also an invaluable resource for managers, colleagues, employers, and employment professionals. This accessible guide includes tools and activities, and each chapter concludes with practical advice for autistic employees and their non-autistic colleagues and employers. Audretsch, 2024-06-04 Far reaching technological developments are making a deep impact on societies and economic environments worldwide. With the emergence of new digital infrastructures such as artificial intelligence, fintech, data analytics, robotics, and nanotech, new creative industries still in a state of flux have arisen while others have disappeared at least in their traditional form. The intermixing of traditional and new technologies has led to a redrawing of boundaries and an extension of the limits of entrepreneurship out towards industries with hitherto high barriers to entry due to regulatory, technological, or structural factors. These external enablers have led to a democratization of entrepreneurship and a lessening of the obstacles to starting up a company by reducing or eliminating the difficulties inherent in the entrepreneurial phenomenon in its classical configuration such as high resource intensity, uncertainty, limited time, or information asymmetry. The De Gruyter Handbook of Digital Entrepreneurship examines the impact of these technological disruptions not only using the existing paradigms but also by re-examining our very conception of the entrepreneurial phenomenon in terms of its evolving nature and shifting contours. The contributions to this handbook promote the emergence of new theories and conceptions of the entrepreneurial opportunity and process that more fully reflect the realities of the new environment we are living in. They will benefit both academics aiming to familiarize themselves with the state of research and theory within topics and subtopics in digital entrepreneurship as well as practicing entrepreneurs and managers aiming to acquaint themselves with leading edge practices and insights in digital entrepreneurship.
