

# Study Guide to GATTACA

Director: Andrew Niccol  
Screenplay: Andrew Niccol  
Starring: Ethan Hawke, Jude Law, Uma Thurman, Gore Vidal  
Release date: 20 March 1998  
Running time: 106 minutes

## Key Concept

Genetics, genetic engineering, determinism, freedom, identity, discrimination

## Summary

As soon as Vincent (Ethan Hawke) is born, his DNA is analyzed and his future capabilities are predicted—including the fact that he has a 99% chance of dying of a heart disorder when he is 30 years old. As a result, he is doomed to a life of menial

labor.

However, he is determined to get to Gattaca Space Academy and join space missions. Through his sheer determination—and the use of someone else's very superior DNA which he buys illegally—he manages to achieve his ambition. The film ends with him taking off in a rocket for Titan: he has overcome his genetic limitations and is free.

**Advertising Taglines:** "How do you hide when you are running from yourself?"  
"There is no gene for the human spirit."

## Cultural significance

Hardly a week passes without claims by scientists that they have isolated the gene for some particular disease or trait. Increasingly we are told that mental and emotional characteristics can be attributed to our DNA. Insurance companies want to increase genetic testing in order to identify high-risk applicants for life insurance. More and more we are being defined by our genetic make-up. Gattaca explores these issues.

## Biographical background

Gattaca is New Zealander Andrew Niccol's second major screenplay and was his debut as a director. He says, "My genes made me do it. I don't know when I first thought of it, but you can open a newspaper today, and I'm certain that you'll read something about a new gene, and it became inescapable for me as a story idea." He had earlier written the screenplay for The Truman Show.

## Overview

The film opens with a text from the Bible – Ecclesiastes 7:13 "Consider what God has done: Who can straighten what he has made crooked?" It continues to tell how our civilization may, in the not too distant future, attempt to do this.

This is a world in which women take swabs of their lips to catch the saliva from a potential husband's kiss in order to have the DNA analyzed - to assess their positive and negative attributes. It is a world in which pianists are genetically engineered so that they can play pieces "that can only be played with 12 fingers". It is a world in which police and security checks are carried out by immediate DNA analysis from blood samples.

Vincent, the main character, was conceived by a young couple in love – in the back of a car rather than in a laboratory. Thus he was destined to be a second class citizen along with others born in the same way – and called "faith births" or "degenerates" or "invalids". Within seconds of his birth his DNA was analyzed and

**Gattaca** Peter J. Malone, 2002      Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences      Control Adam Rutherford, 2022-11-15 How did an obscure academic idea pave the way to the Holocaust within just fifty years Control is a book about eugenics what geneticist Adam Rutherford calls a defining idea of the twentieth century Inspired by Darwin's ideas about evolution eugenics arose in Victorian England as a theory for improving the British population and quickly spread to America where it was embraced by presidents funded by Gilded Age monopolists and enshrined into racist American laws that became the ideological cornerstone of the Third Reich Despite this horrific legacy eugenics looms large today as the advances in genetics in the last thirty years from the sequencing of the human genome to modern gene editing techniques have brought the idea of population purification back into the mainstream Eugenics has a short history but a long past Rutherford writes The first half of Control is the history of an idea from its roots in key philosophical texts of the classical world all the way into their genocidal enactment in the twentieth century The second part of the book explores how eugenics operates today as part of our language and culture as part of current political and racial discussions and as an eternal temptation to powerful people who wish to improve society through reproductive control With disarming wit and scientific precision Rutherford explains why eugenics still figures prominently in the twenty first century

despite its genocidal past And he confronts insidious recurring questions did eugenics work in Nazi Germany And could it work today revealing the intellectual bankruptcy of the idea and the scientific impossibility of its realization     **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004     **TV Guide** ,1999     **Emotions Online** Alan Petersen,2022-12-30 Digital media have become deeply immersed in our lives heightening both hopes and fears of their affordances While the internet mobile phones and social media offer their users many options they also engender concerns about their manipulations and intrusions Emotions Online explores the visions that shape responses to media and the emotional regimes that govern people s engagements with them This book critically examines evidence on the role of digital media in emotional life Offering a sociological perspective and using ideas from science and technology studies and media studies it explores The dimensions and operations of the online emotional economy Growing concerns about online harms and abuse especially to children Deepfakes and other forms of image based abuse The role of hope in shaping online behaviours Digital well being and its market COVID 19 s impacts on perceptions of digital media and Big Tech Growing challenges to centralised control of the internet and the implications for future emotional life The book breaks new ground in the sociological study of digital media and the emotions It reveals the dynamics of online emotional regimes showing how deceptive designs and algorithm driven technologies serve to attract and engage users As it argues digital media rely on the emotional labours of many people including social media influencers and content moderators who make the internet seem smart The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research policy and action     **Film International** ,2006     *Chinquapin* ,2004     *Billboard* ,1998-03-07 In its 114th year Billboard remains the world s premier weekly music publication and a diverse digital events brand content and data licensing platform Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music video gaming media digital and mobile entertainment issues and trends     *Mother Jones Magazine* ,1998-05 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues     *Cambridge Wizard Student Guide Gattaca* Marcia Pope,Richard McRoberts,2003-04-02 Gattaca is a thought provoking SF film centred on a key contemporary issue genetic engineering In this study guide two experienced teachers one a film lecturer offer background on the movie explaining how to read it in cinematic terms before taking you through the film scene by scene drawing out its subtext in easy to understand language and offering you key quotes to use Also offered are generous notes on characters themes critical reviews and finally a full length A exam essay on the text     *English in Australia* ,2003     **Journal of the American Medical Association** ,2009-03     *Sight and Sound* ,1998     *International Dictionary of Films and Filmmakers: Actors and actresses* Tom Pendergast,Sara Pendergast,2000 Contains over two thousand entries arranged alphabetically within four volumes that provide information about significant films actors and actresses directors and writers and production artists in North American British and West
