Krech, Stephanie DiLorenzo, 2010 Liven up lessons with a book and CD that take full advantage of the SMART Board's interactive features. The Math Word Problems CD contains eight units on key problem solving strategies such as guess and check, draw a picture, look for a pattern, use logical reasoning, and more. Students can easily draw, move, highlight, and underline text right on the board. Step by step mini lessons in each book correspond to the Notebook files on the CD. A surefire way to motivate and engage every student.

Place Value, Grade 3 Workbook Maria Miller, 2016-02-28 Place Value Grade 3 Workbook covers 4 digit numbers, numbers with thousands, and adding and subtracting them. We also study rounding and estimating, which are very important skills for everyday life. First, students learn 4 digit numbers, place value, breaking numbers such as 3,498 into thousands, hundreds, tens, and ones, and comparing 4 digit numbers. Next, they practice some mental addition and subtraction with 4 digit numbers. The lesson stresses the similarities between adding and subtracting 4 digit numbers and adding and subtracting smaller numbers. Practicing mental math also helps to build number sense. We also study regrouping in addition and subtraction using 4 digit numbers. The last major topics in this book are rounding numbers to the nearest hundred and estimating. Students also get to do some more word problems.

Materials and Methods for Teaching Place Value at the Third Grade Level Virgie Lutz, 1963 *Number Club: A Game of Place Value*, Linda Paulsen offers the instructions for creating and playing Number Club, a card game for 2nd and 3rd grade students that reviews place value within three digit numbers. Bernie Dodge provides the instructions online as part of a resource on exploratory learning through simulation and games featuring activities created by students in education classes at San Diego State University.

Math Champs! Counting & Place Value (eBook) Sally Fisk, 2000-09-01 Introductory activity pages help students with counting and place value. Dot to Dot puzzles, riddles, and other games add fun to the practical activities. These pages may be assigned as a class lesson, individual seat work, or homework activities.

Number Sense Routines Jessica Shumway, 2023-10-10 Following up her best selling book *Number Sense Routines: Building Numerical Literacy Every Day in Grades K-3*, Jessica Shumway turns her focus to upper elementary classrooms. *Number Sense Routines: Developing Mathematical Understanding Every Day in Grades 3-5* is about tapping into every child's innate number sense and providing daily connected experiences that are responsive to children's learning needs. Consistent Daily Routines Work! Adaptable to any curriculum, Shumway's 5, 10, or 15 minute warm up routines are an easy and effective way to build and solidify students' number sense foundations as a supplement to any program. Planning and Facilitating Your Classroom No matter how familiar the routine, Shumway provides insight on how to keep daily warm ups fresh. She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms. Assessment Strategies As students engage in the process, each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking. Identify Big Ideas Not only will these math routines help develop students' mathematical understanding as they move towards using

standard algorithms but teachers will learn to better recognize the big ideas that emerge in discussions how to encourage important strategies based in number sense and how to facilitate conversations on key mathematical concepts These routines may appear in other places but I have never seen them written in such detail and with so many variations Although she makes what she does sound easy we all know that teaching math well is anything but easy It is challenging and complex Unpacking what students are saying helping them make connections not only to the math but to each other s ideas while simultaneously recording their ideas using mathematical models visuals or equations is no easy task Jessica provides wonderful visuals examples of student work and so much more to help educators develop the tools they need to improve their practice and in so doing improve student learning From the Foreword by math coach and consultant Lucy West

Right-Brained Place Value Book and Games Sarah Major,2013-01-01 **I Have, Who Has? Place Value Grade 3-4** EAI Education,2011-01-01 I Have Who Has games are an engaging way to practice and reinforce math skills in small groups This fast paced card game is perfect for developing fluency with basic facts or for use as a quick assessment of students understanding The 36 sturdy laminated cards are designed to be self checking so that when each game is solved correctly whole shapes will form on the backs of the cards Includes 6 different color coded games 6 cards per game and an answer key Provides practice with early simple addition Cards measure 4L x 6W Aligns with Common Core State Standards
