Healthcare Transformation with Informatics and Artificial Intelligence J. Mantas,P. Gallos,E. Zoulias,2023-07-27 Artificial intelligence AI is once again in the news with many major figures urging caution as developments in the technology accelerate AI impacts all aspects of our lives but perhaps the discipline of Biomedical Informatics is more affected than most and is an area where the possible pitfalls of the technology might have particularly serious consequences This book presents the papers delivered at ICIMTH 2023 the 21st International Conference on Informatics Management and Technology in Healthcare held in Athens Greece from 1 3 July 2023 The ICIMTH conferences form a series of scientific events which offers a platform for scientists working in the field of biomedical and health informatics from all continents to gather and exchange research findings and experience The title of the 2023 conference was Healthcare Transformation with Informatics and Artificial Intelligence reflecting the importance of AI to healthcare informatics A total of 252 submissions were received by the Program Committee of which 149 were accepted as full papers 13 as short communications and 14 as poster papers after review The papers cover a wide range of technologies and topics include imaging sensors biomedical equipment and management and organizational aspects as well as legal and social issues The book provides a timely overview of informatics and technology in healthcare during this time of extremely fast developments and will be of interest to all those working in the field

The DNA Replication-Repair Interface ,2021-11-12 Replication Coupled Repair Volume 661 in the Methods in Enzymology series highlights new advances in the field with this new volume presenting interesting chapters on a variety of timely topics including the Repair of replication born DNA breaks by sister chromatid recombination High resolution and high throughput DNA cyclization measurements to interrogate DNA bendability A programmable detection method for genomic signatures from disease diagnosis to genome editing Characterization of the telomerase modulating activities of yeast DNA helicases Eukaryotic DNA replication with purified budding yeast proteins Single molecule studies of yeast Rad51 paralogs Light activation and deactivation of Cas9 for DNA repair studies and more Other chapters explore MIDAS Direct sequencing to map mitotic DNA synthesis and common fragile sites at high precision Studying the DNA damage response in embryonic systems GLASS ChIP to map Mre11 cleavage sites in the human genome New chemical biology approaches to trap reaction intermediates in living cells Single molecule imaging approaches for monitoring replication fork conflicts at genomic DNA G4 structures and R loops in human cells Monitoring the replication of structured DNA through heritable epigenetic change Visualizing replication fork encounters with DNA interstrand crosslinks and much more Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in Methods in Enzymology series Includes the latest information on replication coupled repair

Ctenophores Leonid L. Moroz,2024-04-26 This volume explores emerging approaches and methods inspired by recent research using ctenophores or placozoans facilitating the study of these enigmatic species and ancient animal lineages Practical protocols are integrated with introductory

chapters about general biology summarizing the diversity evolution genomics development and neurobiology of these organisms Special chapters outline strategies and applications for culturing microscopy physiology electrical synapses and bioluminescence molecular and single cell biology transcription factors as well as gene and protein expression analyses The book also contains bioinformatics and computational chapters covering peptidomics and epigenomics Written for the highly successful Methods in Molecular Biology series chapters include detailed implementation advice that leads to dependable results in the laboratory Authoritative and practical Ctenophores Methods and Protocols is an ideal resource for comparative and experimental biologists and interdisciplinary scientists aiming to decipher fundamental principles of animal organization origin and the evolution of biological complexity in general opening novel avenues for future synthetic biology research

Smart Technologies, Systems and Applications Fabián R. Narváez, Micaela N. Villa, Gloria M. Díaz, 2025-09-02 This two volume set CCIS 2392 and CCIS 2393 constitutes the refereed proceedings of the 4th International Conference on Smart Technologies Systems and Applications SmartTech IC 2024 held in Quito Ecuador during December 2 4 2024 The 68 full papers presented in these proceedings were carefully reviewed and selected from 168 submissions They were categorized under the following topical sections Part I Smart Technologies Smart Systems Part II Smart Trends and Applications Poster Session

The Use Case and Smart Grid Architecture Model Approach Marion Gottschalk, Mathias Uslar, Christina Delfs, 2017-01-10 This book introduces readers to the fundamentals of the IEC 62559 Use Case Methodology explains how it is related to the Smart Grid Architecture Model SGAM and details how a holistic view for both architecture and requirements engineering can be achieved It describes a standardized and holistic approach to requirements engineering for smart grid projects based on work conducted in the context of the EU M 490 standardization mandate Over the last years this method has been established in Europe as the basic building block of requirements engineering in the utilities sector The authors present a canonical structured approach that users can apply to the Use Case Methodology and the SGAM as well as open tools for this purpose The application in various domains outside the smart grid is also discussed as it can be used for critical infrastructures or system of systems domains like Industrie 4 0 and Ambient Assisted Living Accordingly the book also presents various architecture models for different fields of application like EMAM SCIAM RAMI 4 0 and MAF

Signal and Information Processing, Networking and Computers Songlin Sun, Tao Hong, Peng Yu, Jiaqi Zou, 2022-10-12 This book collects selected papers from the 9th Conference on Signal and Information Processing Networking and Computers held online in December 2021 The book focuses on the current works of information theory communication system computer science aerospace technologies big data and other related technologies Readers from both academia and industry of this field can contribute and find their interests from the book
