Artificial Intelligence, Machine Learning, and Optimization Tools for Smart Cities Panos M. Pardalos, Stamatina Th. Rassia, Arsenios Tsokas, 2022-01-09 This volume offers a wealth of interdisciplinary approaches to artificial intelligence machine learning and optimization tools which contribute to the optimization of urban features towards forming smart sustainable and livable future cities Special features include New research on the design of city elements and smart systems with respect to new technologies and scientific thinking Discussions on the theoretical background that lead to smart cities for the future New technologies and principles of research that can promote ideas of artificial intelligence and machine learning in optimized urban environments The book engages students and researchers in the subjects of artificial intelligence machine learning and optimization tools in smart sustainable cities as eminent international experts contribute their research results and thinking in its chapters Overall its audience can benefit from a variety of disciplines including architecture engineering physics mathematics computer science and related fields

The Housing Bomb M. Nils Peterson, Tarla Peterson, Jianguo Liu, 2013-10-29 How our thirst for more and larger houses is undermining society and what we can do about it Have we built our way to ruin Is your desire for that beach house or cabin in the woods part of the environmental crisis Do you really need a bigger home Why don't multiple generations still live under one roof In The Housing Bomb leading environmental researchers M Nils Peterson Tarla Rai Peterson and Jianguo Liu sound the alarm explaining how and why our growing

addiction to houses has taken the humble American dream and twisted it into an environmental and societal nightmare Without realizing how much a contemporary home already contributes to environmental destruction most of us want bigger and bigger houses and dream of the day when we own not just one dwelling but at least the two our neighbor does We push our children to get out on their own long before they need to creating a second household where previously one existed We pave and build demolishing habitat needed by threatened and endangered species adding to the mounting burden of global climate change and sucking away resources much better applied to pressing societal needs Reduce reuse recycle is seldom evoked in the housing world where economists predict financial disasters when new housing starts decline and the idea of renovating inner city residences is regarded as merely a good cause Presenting irrefutable evidence this book cries out for America and the world to intervene by making simple changes in our household energy and water usage and by supporting municipal state national and international policies to counter this devastation and overuse of resources It offers a way out of the mess we are creating and envisions a future where we all live comfortable nondestructive lives The housing bomb is ticking and our choice is clear change our approach or feel the blast *From Intelligent to Smart Cities* Mark

Deakin, Husam Al Waer, 2015-04-24 The concept of smart cities offers a revolutionary vision of urban design for sustainability Utilizing the intelligent application of new technologies smart cities also incorporate considerations of social and environmental capital in order to transform the life and work of cities This book brings together papers from leading international experts on the transition to smart cities Drawing upon the experiences of cities in the USA Canada and Europe the authors describe the definitional components critical insights and institutional means by which we can achieve truly smart cities The resulting volume will be of interest to all involved in urban planning architecture and engineering as well as all interested in urban sustainability This book was published as a special issue of *Intelligent Buildings International*

Smart Cities Mark Deakin, 2013-08-22 Smart city development has emerged a major issue over the past 5 years Since the launch of IBM's Smart Planet and CISCO's Smart Cities and Communities programmes their potential to deliver on global sustainable development targets have captured the public's attention However despite this growing interest in the development of smart cities little has as yet been published that either sets out the state of the art or which offers a less than subjective arm's length and dispassionate account of their potential contribution This book brings together cutting edge research and the findings from technical development projects from leading authorities within the field to capture the transition to smart cities It explores what is understood about smart cities paying particular attention on the governance modelling and analysis of the transition that smart cities seek to represent In paving the way for such a representation the book begins to account for the social capital of smart communities and begins the task of modelling their embedded intelligence through an analysis of what the embedded intelligence of smart cities contributes to the sustainability of urban development This innovative book offers an interdisciplinary perspective and shall be of interest to researchers policy

analysts and technical experts involved in and responsible for the planning development and design of smart cities It will also be of particular value to final year undergraduate and postgraduate students interested in Geography Architecture and Planning

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In The Art of Classic Planning architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers The Art of Classic Planning restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world The Art of Classic Planning celebrates the enduring principles of urban design and invites us to

return to building beautiful cities *Public Transport Planning with Smart Card Data* Fumitaka Kurauchi, Jan-Dirk Schmöcker, 2017-02-17 Collecting fares through smart cards is becoming standard in most advanced public transport networks of major cities around the world Travellers value their convenience and operators the reduced money handling fees Electronic tickets also make it easier to integrate fare systems to create complex time and space differentiated fare systems and to provide incentives to specific target groups A less utilised benefit is the data collected through smart cards Records even if anonymous provide for a much better understanding of passengers travel behaviour as current literature shows This information can also be used for better service planning Public Transport Planning with Smart Card Data handles three major topics how passenger behaviour can be estimated using smart card data how smart card data can be combined with other trip databases and how the public transport service level can be better evaluated if smart card data is available The book discusses theory as well as applications from cities around the world and will be of interest to researchers and practitioners alike who are interested in the state of the art as well as future perspectives that smart card data will bring

Co-Creation and Smart Cities Shenja van der Graaf, Le Anh Nguyen Long, Carina Veeckman, 2021-11-15 Co creation and Smart Cities Looking Beyond Technology highlights a more robust value based perspective on public service development and delivery helping structure co creation processes that foster responsible innovation and a systemic value based approach to sustainable urban development Multiuse Wetlands Governance Dinesh K. Marothia, 2023-11-24 The Ramsar Convention was established in 1971 to ensure the conservation and wise use of wetlands across the world India joined the Convention in 1982 however in the past 50 years despite Ramsar s incredible achievements the threat to wetlands across the globe including India has not diminished This book studies the governance of multiuse wetlands in India The volume provides an exhaustive analysis of rural peri urban and urban human made wetlands to establish the relevance of institutional design and the effective role of authority in governing multiuse wetland ecosystem services The author argues that the most challenging task in governing wetlands is to frame institutional choices that users and non users comprehend and agree to pursue under alternative property rights regimes Drawing on extensive fieldwork the book provides a broad look into the causes and consequences of wetland ecosystem degradation and offers insights into improved sustainable management systems for different types of multiuse wetlands It will be indispensable for students and researchers of environmental studies sustainable development biodiversity conservation and agricultural natural and environmental resource economics
