CHANGING FIRING MODES

Changing between firing modes is simple. Use a 5/64-inch allen wrench to open the left side grip panel. Remove and unplug the battery, taking care to pull the battery clip away from the battery, rather than pulling on the battery wires. Hold down the trigger while re-attaching the battery, and the marker's microprocessor will switch to a new mode, indicating the change by blinking the power LED. The number of times the LED blinks will indicate the newly selected mode. Replace the battery in the grip frame, carefully tucking in the wires, and re-secure the left side grip with a 5/64-inch allen wrench.

AVAILABLE FIRING MODES

- **Select Fire (Single Flash)** - In this mode, the player can choose between semi-automatic (one shot per trigger pull) 3-round burst (3 shots in a row fired while the trigger is pulled and held) or full-automatic (fires repeatedly when the trigger is pulled and held.) Tapping the power button while the marker is live cycles through the firing modes, each indicated by the rate at which the power LED blinks.
- **2009 PSP (Double Flash)** - The marker will fire one shot per trigger pull until the trigger is pulled 3 or more times rapidly in quick succession, at which point it will fire additional shots per trigger pull up to a maximum of 10 shots per second. If the trigger is inactive brief time, the marker will revert to the beginning of the sequence, firing one shot per trigger pull, in accordance with PSP 2009 season tournament rules.
- **Locked Semi-Automatic (Triple Flash)** - The marker will fire one shot per trigger pull, and can not be changed without using tools to open the grip. This mode complies with tournaments, fields and scenario games that limit players to semi-automatic mode only.
- **Billy-Ball (Quadruple Flash)** - This is a limited rate semi-automatic mode, firing one shot per trigger pull, but only allowing players to fire once every two seconds. Billy-Ball games focus on movement and strategy over heavy rate of fire, reducing paint costs.
