The Out-of-Sync Child, Third Edition Carol Stock Kranowitz, 2022-04-19 2022 Mom's Choice Gold Award Winner. The groundbreaking book that explains Sensory Processing Difference (SPD) and presents a drug-free approach that offers hope for parents. Now revised and updated. Does your child exhibit Over-responsivity or under-responsivity to touch or movement? A child with SPD may be a sensory avoider withdrawing from touch, refusing to wear certain clothing, avoiding active games, or he may be a sensory disregarder needing a jump start to get moving. Over-responsivity or under-responsivity to sounds, sights, taste, or smell. She may cover her ears or eyes, be a picky eater, or seem oblivious to sensory cues. Cravings for sensation. The sensory craver never gets enough of certain sensations, e.g., messy play, spicy food, noisy action, and perpetual movement. Poor sensory discrimination. She may not sense the difference between objects or experiences, unaware of what she's holding, unless she looks, and unable to sense when she's falling or how to catch herself. Unusually high or low activity level. The child may be constantly on the go, wearing out everyone around him, or move slowly and tire easily, showing little interest in the world. Problems with posture or motor coordination. He may slouch, move awkwardly, seem careless, or accident-prone. These are often the first clues to Sensory Processing Difference, a common but frequently misdiagnosed problem in which the central nervous system misinterprets messages from the senses. *The Out of Sync Child* offers comprehensive, clear information for parents and professionals and a drug-free treatment approach for children. This revised edition includes expanded information about SPD look-alikes including Learning Disabilities, ADHD, and autism, about diagnosis and treatments, and about other topics.
