Karlsén, De Montfort University, 1998-08-28. Mechatronics, a synergistic combination of mechanical, electronic, and computing engineering technologies, is a truly multidisciplinary approach to engineering. New products based on mechatronic principles are demonstrating reduced mechanical complexity, increased performance, and often previously impossible capabilities. This book contains the papers presented at the UK Mechatronics Forum's 6th International Conference held in Skövde, Sweden, in September 1998. Many of these high-quality papers illustrate the tremendous influence of mechatronics on such areas as manufacturing, machinery, automotive engineering, textiles, manufacture, robotics, and real-time control and vision systems. There are also papers describing developments in sensors, actuators, control, and data processing techniques such as fuzzy logic and neural networks, all of which have practical application to mechatronic systems. *Applied Soft Computing Technologies: The Challenge of Complexity* Ajith Abraham, Bernard de Baets, Mario Köppen, Bertram Nickolay, 2006-08-11. This volume presents the proceedings of the 9th Online World Conference on Soft Computing in Industrial Applications held on the World Wide Web in 2004. It includes lectures, original papers, and tutorials presented during the conference. The book brings together outstanding research and developments in soft computing, including evolutionary computation, fuzzy logic, neural networks, and their fusion and its applications in science and technology.
