Navigating Technomedia Sam Han, 2008 This is an introductory survey of what the author calls the technomedia the generation of communication technologies after television cell phones and the first wave of the Internet Beginning with a history of media the book explores the nature and effects of technomedia like the blogosphere Blackberries and related technologies Because they are transforming the relations of their users to the social environment the topic is fast becoming an important focus of modern social theory Americans Thinking America Charles Lemert, 2025-01-31 In this dynamic book Charles Lemert elaborates a vigorous distinctive and creative American tradition in social thought American social theory has tended to be overshadowed by European social thought Yet looking deeper Americans have always made important contributions to social theory Drawing upon the work of a dazzling array of both seminal and unjustly overlooked philosophers sociologists litterateurs and political activists Lemert constructs a coherent yet variegated intellectual framework for understanding American social theory and culture from the colonial era to the present In doing so Lemert analyses American intellectual attitudes on race gender popular culture political thought capitalism and social movements while also exploring schools of thought from transcendentalism and pragmatism to interactionism and intersectionality In his inimitable style Charles Lemert a master of finding theory where you d least expect it offers a masterful rendering of the American tradition in social theory In doing so Lemert shines new light on social theory and American history Both authoritative and accessible this indispensable work will be essential reading for students scholars and general readers with interests in social theory and American social history Web 2.0 Sam Han, 2012-03-29 Examining the arrival of Web 2 0 in accessible language as a multidimensional socio technological process this book provides and introduction to everything you ever wanted to know about Web 2 0 and the surrounding social impacts arising from our regular use of the Internet The Routledge Companion to Social Theory Anthony Elliott, 2009-12-04 A collection of introductory essays by an international range of contributors giving an insightful overview of classical and contemporary social theory *No Family History* Sabrina McCormick, 2009-06-16 No Family History presents compelling evidence of environmental links to breast cancer ranging from everyday cosmetics to industrial waste Sabrina McCormick weaves the story of one survivor with no family history into a powerful exploration of the big business of breast cancer As drugs pink products and corporate sponsorships generate enormous revenue to find a cure a growing number of experts argue that we should instead increase focus on prevention reducing environmental exposures that have contributed to the sharp increase of breast cancer rates But the dollars continue to pour into the search for a cure and the companies that profit including some pharmaceutical and cosmetics companies may in fact contribute to the environmental causes of breast cancer No Family History shows how profits drive our public focus on the cure rather than prevention and suggests new ways to reduce breast cancer rates in the future *Silence and Society* Charles Lemert, 2025-07-31 Silence and Society addresses the reality that social sciences have ignored the

importance of silence in human communication Without communication there is no community and thus no society Yet as classic communication theory explains communication must always deal with noise Increasingly as cyber technologies and media have gained the upper hand in social life so have they become purveyors of empty noise from mindless sitcom television to uninformed talk radio to cable news blather and more The book is organized into three sections each corresponding to a level of social order Each bears a distinctive relation to the general problem of silence and noise in human community Part One Social Facts of Silence presents examples of the ways silence intrudes on vital aspects of human life in personal self understanding in the irony that direction communication requires a third absent party such as Goffman's ego identity in the fact that personal identity is the challenge of dealing with the trouble of deciding who we are in a given social setting Part Two Noise Dreams and Identity Confusions considers a range of community issues from the strange noises of quiet neighborhoods to the way the necessity of social conformity silences individual autonomy to the fact that the dead are ever present in daily language and behavior especially in common religious practices Finally Part Three Waste Death and the Beyond of Time suggests the principal ways the growing global environment aggravates human inequality by forcing the poor into zones of exclusion by increasing the mountain of human waste that in turn wastes human lives by the extent to which global theories and programs for economic development are little more

Technologies of Religion Sam Han, 2016-02-05 Bringing together empirical cultural and media studies of religion and critical social theory *Technologies of Religion Spheres of the sacred in a post secular modernity* investigates powerful entanglement of religion and new media technologies taking place today taking stock of the repercussions of digital technology and culture on various aspects of religious life and contemporary culture more broadly Making the argument that religion and new media technologies come together to create spheres environments produced by an architecture of digital technologies of all sorts from projection screens to social networking sites the book suggests that prior social scientific conceptions of religious worship participation community and membership are being recast Using the case of the strain of American Christianity called multi site an emergent and growing church model that has begun to win favor largely among Protestants in the last decade the book details and examines the way in which this new mode of religiosity bridges the realms of the technological and the physical Lastly the book situates and contextualizes these developments within the larger theoretical concerns regarding the place of religion in contemporary capitalism *Technologies of Religion Spheres of the sacred in a post secular modernity* offers an important contribution to the study of religion media technology and culture in a post secular world
