Will Sutherland, 2019-10-15 School buses that have been converted into mobile living spaces known as skoolies are a natural extension of the tiny house craze. Buses are not only easier and safer to drive than an RV; they provide a jump start on the conversion process with frame, roof and floor already in place. Experienced builder Will Sutherland, whose creative school bus conversions have been featured in *Road and Track* and *Popular Mechanics*, is behind the wheel of this alluring look at life on the road. In addition to profiles of eight fellow skoolie fans and stunning photos of bus interiors designed for simple living, Skoolie does what no other book on the subject has: it offers a complete step-by-step guide to the conversion process from seat removal to planning layout and installing insulation, flooring and furnishings that meet your needs. **Medium/heavy**

Truck Wheel Separations United States. National Transportation Safety Board, 1992 In the fall of 1991 a series of five truck wheel runoff accidents occurred in which a total of seven people died. The seemingly high incidence of similar fatal accidents aroused public and Congressional concern about the potential magnitude of the wheel separation problem. In November 1991 the Safety Board initiated a special investigation to determine the magnitude of the wheel separation problem, the types and causes of failures and the adequacy of current truck wheel inspection and maintenance guidance and procedures. The Federal Highway Administration's Office of Motor Carriers and the National Highway Traffic Safety Administration assisted the Safety Board in the review of accident and inspection records. As a result of this special investigation the National Transportation Safety Board made recommendations to the Department of Transportation, the Federal Highway Administration and the American Trucking Associations. *McGregor V.
