Anticancer Therapeutics Sotiris Missailidis, 2008-10-13 Written by the winner of the 2008 Mike Price Fellowship This volume provides a comprehensive overview of the wealth of information now available in this important and fast moving subject Anticancer Research November December 2008 This book provides a clear introduction to the area with an overview of the various drug design and

development approaches for cancer therapeutics and their progress in today's multidisciplinary approach to cancer treatment. Clearly structured throughout the book not only provides information on currently used molecular treatment approaches but also describes the various agents that are currently at various stages of development and clinical trials thus making them the drugs of tomorrow. The book goes on to present current therapeutic regimes including their indications and side effects as well as their position in the international market in terms of sales and development costs. Furthermore, coverage of our advancement in the understanding of cancer biology and how this has driven the drug discovery process is clearly discussed. Modern drug discovery aspects through genomic, proteomic and metabolomic approaches are referred to as well as combinatorial chemistry techniques and discovery of chemotherapeutic agents from plant extracts, re-use of old drugs and drugs from other indications or de novo rational drug design. Including contributions from leading experts in the field, this book provides the reader with a complete overview of the various types of therapeutic agents, current and emerging as well as other aspects associated with anticancer therapy, drug design, resistance and clinical trials in oncology.

Oncologic Emergency Medicine Knox H. Todd, Charles R. Thomas, Jr., 2016-05-13 This is the first comprehensive clinical reference on cancer emergencies. It is edited and written by world renowned experts in emergency medicine and oncology and covers the diagnosis and management of the full range of emergencies caused directly by cancer or by its treatment. It shows how the entire spectrum of clinical medicine is brought to bear in the care of cancer patients in the unique setting of the emergency department. ED from health promotion and prevention to treatment and palliative care. Recognizing the multiple overlapping contexts in which emergency care of cancer patients occurs, the book addresses clinically crucial interdisciplinary topics such as the ethics of ED cancer care, the interface with palliative social work, substance abuse and more. Finally, perspective on care system and social forces that shape ED cancer care such as cancer care disparities and care models and on how ED cancer care is delivered outside of the United States. Frame the book as a whole. Against the backdrop of rising numbers of cancer patients and survivors as the United States population ages and a forecast shortage of oncologists, this book is designed to serve as the authoritative single source clinical reference on cancer emergencies. The intended audience includes emergency physicians, oncologists, internists, family physicians, emergency nurses, nurse practitioners, physician assistants, policy makers as well as pre and postgraduate trainees.
