

## Conversion from external to internal regulator alternator

Existing Alternator and  
Voltage Regulator  
connections

Regulator  
Jumper Connector

Converted Alternator and  
Voltage Regulator  
connections

New Alternator  
Jumper Wires

### INSTALLATION INSTRUCTIONS

1. Before attempting any modifications involving the charging system, the battery should be disconnected.
2. Unplug the 2 place connector from the existing alternator and plug it into the new alternator jumper wires mating connector.
3. Unbolt the power lead wire from the existing alternator and remove the old alternator from the car.
4. Install your new internally regulated alternator. Plug in the 2 place connector on the new alternator jumper wires and bolt the alternator power wire to the "BAT" post.
5. Make sure that the alternator is properly grounded. In most cases the alternator is grounded through the engine block to the frame. However, this is not always true. If in doubt, a ground wire can be installed from the alternator case ground bolt to a good chassis ground.
6. Unplug the 4 place connector from the external voltage regulator and plug it into the supplied regulator jumper connector.
7. Remove the existing voltage regulator from the car.
8. Reconnect the battery.
