Budgeting and Financial Management for National Defense Jerry L. McCaffery, Lawrence R. Jones, 2004-02-01 Most of the literature on public sector budgeting ignores defense budgeting even though aircraft ships tanks smart weaponry skilled crews electronically boosted infantry and other facets of national defense represent a large part of the federal government s discretionary spending The budget Bibliography for Advancement Study ,1995 **National Defense Budgeting and Financial Management** Philip J. Candreva, 2017-05-01 The U S Department of Defense accounts for over half of federal government discretionary spending and over 3% of GDP Half of all federal employees work for the Department The annual budget for the military not only provides for those salaries it covers the baseline and wartime operating expenses of the force and hundreds of billions of dollars of investment in new capabilities and technologies Given the materiality of the defense function and amount of resources it consumes the processes for budgeting for defense and managing the funds is important to understand This text provides a fully integrated view of defense budgeting It takes the position that defense budgeting is a specific instance of public budgeting and public budgeting is a specific instance of public policy In order to fully understand how the nation budgets for defense it first lays a theoretical and conceptual foundation for public policy and public budgeting That is followed by an assessment of the political and policy context for defense including the overarching federal budget process and role of Congress in setting defense policy Only then does the text explore the specifics of defense budgeting how by whom and why the budget is crafted Beyond the topic of budgeting formulating requesting and legitimating the request for funds the book tackles financial management topics Included are discussions of federal appropriations law funds

management accounting requirements intragovernmental business transactions and contemporary topics of defense policy such as funding overseas contingency operations in an era of deficit control legislation This book is an appropriate reference for both students and practitioners of defense budgeting and financial management It would also be appropriate in a general public budgeting course Most public budgeting texts focus on state and municipal governments and there are few that address the federal system This book fills that gap and provides a specific example of federal budgeting

Budgeting and Financial Management in the Federal Government Jerry L. McCaffery, Lawrence R. Jones, 2002-02-01 Mission Statement The mission of the book series is to be consistent with the mission statement of the International Public Management Network IPMN that will sponsor the series The mission of IPMN and the book series is to provide a forum for sharing ideas concepts and results of research and practice in the field of public management and to stimulate critical thinking about alternative approaches to problem solving and decision making in the public sector The book series editors will seek to facilitate exchange and cooperative work among scholars interested in transformational change in the public sector in individual nations and around the world Our intent will be to create and sustain a dialogue on emerging management concepts methods and technology so that readers can learn about innovation and change in public sector organizations throughout the world IPMN presently includes members representing 70 different countries approximately 600 representatives from these nations As such we have a solid base of subscription support for the book series within IPMN For more information on IPMN see the website at <http://www.willamette.org/ipmn/about.html> In addition we want the series to appeal to members of the Public Sector section of the Academy of Management and to the members of the Association for Public Policy Analysis and Management Both editors belong to and participate actively in AOM and APPAM
