Tempting Fate Paul C. Avey, 2019-11-15 Unpacking of the dynamics of conflict under conditions of nuclear monopoly Paul C Avey argues in Tempting Fate that the costs and benefits of using nuclear weapons create openings that weak nonnuclear actors can exploit Avey uses four case studies to show the key strategies available to nonnuclear states Iraqi decision making under Saddam Hussein in confrontations with the United States Egyptian leaders thinking about the Israeli nuclear arsenal during wars in 1969 70 and 1973 Chinese confrontations with the United States in 1950 1954 and 1958 and a dispute that never escalated to war the Soviet United States tensions between 1946 and 1948 that culminated in the Berlin Blockade Strategies employed include limiting the scope of the conflict holding chemical and biological weapons in reserve seeking outside support and leveraging international non use norms Avey demonstrates clearly that nuclear weapons cast a definite but limited shadow and while the world continues to face various nuclear challenges understanding conflict in nuclear monopoly will remain a pressing concern for analysts and policymakers Thanks to generous funding from Virginia Tech and its participation in TOME the ebook editions of this book are available as Open Access volumes available from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Amrein-Beardsley, 2014-04-24 Since passage of the No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways The Labor of Lunch Jennifer E. Gaddis, 2019-11-12 There s a problem with school lunch in America Big Food companies have largely replaced the nation s school cooks by supplying cafeterias with cheap precooked hamburger patties and chicken nuggets chock full of industrial fillers Yet it s no secret that meals cooked from scratch with nutritious locally sourced ingredients are better for children workers and the environment So why not empower lunch ladies to do more than just unbox and reheat factory made food And why not organize together to make healthy ethically sourced free school lunches a reality for all children The Labor of Lunch aims to spark a progressive movement that will transform food in American schools and with it the lives of thousands of low paid cafeteria workers and the millions of children they feed By providing a feminist history of the US National School Lunch Program Jennifer E Gaddis recasts the humble school lunch as an important and often overlooked form of public care Through vivid narration and moral heft The Labor of Lunch offers a stirring call to action and a blueprint for school lunch reforms capable of delivering a healthier more equitable caring and sustainable future
