Golden Years? Deborah Carr, 2019-01-22 Thanks to advances in technology medicine Social Security and Medicare old age for many Americans is characterized by comfortable retirement good health and fulfilling relationships But there are also millions of people over 65 who struggle with poverty chronic illness unsafe housing social isolation and mistreatment by their caretakers What accounts for these disparities among older adults Sociologist Deborah Carr's *Golden Years* draws insights from multiple disciplines to illuminate the complex ways that socioeconomic status race and gender shape the nearly every aspect of older adults lives By focusing on an often invisible group of vulnerable elders *Golden Years* reveals that disadvantages accumulate across the life course and can diminish the well being of many Carr connects research in sociology psychology epidemiology gerontology and other fields to explore the well being of older adults On many indicators of physical health such as propensity for heart disease or cancer black seniors fare worse than whites due to lifetimes of exposure to stressors such as economic hardships and racial discrimination and diminished access to health care In terms of mental health Carr finds that older women are at higher risk of depression and anxiety than men yet older men are especially vulnerable to suicide a result of complex factors including the rigid masculinity expectations placed on this generation of men Carr finds that older adults physical and mental health are also closely associated with their social networks and the neighborhoods in which they live Even though strong relationships with spouses families and friends can moderate some of the health declines associated with aging women and especially women of color are more likely than men to live alone and often cannot afford home health care services a combination that can be isolating and even fatal Finally social inequalities affect the process of dying itself with white and affluent seniors in a better position to convey their end of life preferences and use hospice or palliative care than their disadvantaged peers Carr cautions that rising economic inequality the lingering impact of the Great Recession and escalating rates of obesity and opioid addiction among other factors may contribute to even greater disparities between the haves and the have nots in future cohorts of older adults She concludes that policies such as income supplements for the poorest older adults expanded paid family leave and universal health care could ameliorate or even reverse some disparities A comprehensive analysis of the causes and consequences of later life inequalities *Golden Years* demonstrates the importance of increased awareness strong public initiatives and creative community based programs in ensuring that all Americans have an opportunity to age well

Presidential Rhetoric from Wilson to Obama Wesley Widmaier, 2014-11-13 Over the past century presidential constructions of crises have spurred recurring redefinitions of U S interests as crusading advance has alternated with realist retrenchment For example Harry Truman and George W Bush constructed crises that justified liberal crusades in the Cold War and War on Terror In turn each was followed by realist successors as Dwight Eisenhower and Barack Obama limited U S commitments but then struggled to maintain popular support To make sense of such dynamics this book synthesizes constructivist and historical institutionalist insights regarding the ideational overreactions that spur shifts across crusading excesses and realist counter reactions Widmaier juxtaposes what Daniel

Kahneman terms the initial fast thinking popular constructions of crises that justify liberal crusades the slow thinking intellectual conversion of such views in realist adjustments and the tensions that can lead to renewed crises This book also traces these dynamics historically across five periods as Wilson s overreach limited Franklin Roosevelt to a reactive pragmatism as Truman s Cold War crusading incited Eisenhower s restraint as Kennedy Johnson Vietnam era crusading led to Nixon s revived realism as Reagan s idealism yielded to a Bush Clinton pragmatism and as George W Bush s crusading was followed by Obama s restraint Widmaier concludes by addressing theoretical debates over punctuated change historical debates over the scope for consensus and policy debates over populist or intellectual excesses This work will be of great interest to students and scholars of U S Foreign Policy **The Bomb** Fred Kaplan,2020-01-28 From the author of the classic The Wizards of Armageddon and Pulitzer Prize finalist comes the definitive history of American policy on nuclear war and Presidents actions in nuclear crises from Truman to Trump Fred Kaplan hailed by The New York Times as a rare combination of defense intellectual and pugnacious reporter takes us into the White House Situation Room the Joint Chiefs of Staff s Tank in the Pentagon and the vast chambers of Strategic Command to bring us the untold stories based on exclusive interviews and previously classified documents of how America s presidents and generals have thought about threatened broached and just barely avoided nuclear war from the dawn of the atomic age until today Kaplan s historical research and deep reporting will stand as the permanent record of politics Discussing theories that have dominated nightmare scenarios from Hiroshima and Nagasaki Kaplan presents the unthinkable in terms of mass destruction and demonstrates how the nuclear war reality will not go away regardless of the dire consequences Cumulated Index Medicus ,1974
