Microsoft Azure commonly referred to as Azure is a cloud computing service created by Microsoft for building testing deploying and managing applications and services through Microsoft managed data centers It provides software as a service SaaS platform as a service PaaS and infrastructure as a service IaaS and supports many different programming languages tools and frameworks including both Microsoft specific and third party software and systems The major benefit of a remote desktop connection is being able to connect to your data from anywhere in the world Your data is in one place that is easy to see and you no longer have to have software installed on your own computer Azure is one of the best virtual computers and networks providers for remote desktop RDP connections When you create Azure account you pay as you go You purchase Azure services with pay as you go pricing You pay only for what you use each month with no upfront commitment and cancel anytime You must add your credit debit card for billing to use pay as you go subscription But I was looking for totally free subscription where I don t need to add my credit card for billing I found there are two possible options for that 1 A sandbox gives you access to Azure resources Your Azure subscription will not be charged The sandbox may only be used to complete training on Microsoft Learn Creating the Azure Virtual machines using sandbox which is learning subscription you can connect to the VM via RDP port but you cannot access to Internet through the Internet Explorer 2 Alternatively Microsoft Azure provides a free 100 credit for students accounts registered through university emails free student subscription for around one year There is internet access in the VM machine under this type of subscription Azure documentations is too deep and it is hard to be understand creating and managing virtual computers and networks in Azure for remote access connection by any beginner So I tried to outline in this report the most important topics as reference guide to assist the user to create and manage virtual computers and networks in Azure for remote access connection in simplified and clear way This report will include the following parts Getting free Azure subscription through Sandbox Microsoft Learn subscription No credit card needed Free 12 months then pay as you go Azure account subscription Credit card needed Student subscription No debit credit cards needed How to get university email Virtual networks and virtual machines in Azure Quick start for PowerShell in Azure Cloud Shell Quick start with Azure PowerShell Installing Azure CLI on Windows and creating virtual machine Creating a Windows virtual machine in Azure Quick start to create a Linux virtual machine in the Azure portal Tutorial to create a NAT Gateway using the Azure portal and test the NAT service What is Azure Network Watcher Network Watcher Agent Troubleshoot connections with Azure Network Watcher using the Azure portal Troubleshoot Azure VM connectivity problems Quick start to configure Load Balancer Quick start to configure VPN Gateway using Azure portal Tutorial to connect to a virtual machine using Azure Bastion Exercise to create Window Virtual Machine Exercise to create Ubuntu Virtual Machine

Official Gazette of the United States Patent and Trademark Office ,2005 Hosted Order Page , **Quick Guide for Obtaining Free Remote Desktop Protocol (RDP) Services** Dr. Hidaia Mahmood Alassouli,2020-12-05 Remote Desktop Protocol RDP is a proprietary protocol developed by Microsoft which provides a user

with a graphical interface to connect to another computer over a network connection. The user employs RDP client software for this purpose while the other computer must run RDP server software. RDP refers to Remote Desktop protocol which connects your remotely connected computers or system over a RDP connected network. RDP gives a graphical interface to a client to be able to associate with another PC system or network. RDP servers are built on Windows OS but can be enabled to other OS as well. The major benefit of a remote desktop connection is being able to connect to your data from anywhere in the world. Your data is in one place that is easy to see and you no longer have to have software installed on your own computer. In simple terms, RDP is a short form of Remote Desktop Protocol. RDP specifies for home windows servers it works as an icon to get in touch with an additional computer system. Usually, it is utilized for attaching to a server organized in a data center to carry out jobs that typically do not need much user interaction and runs 24/7. Several of the extra usual uses of RDP servers are running bots, SEO devices, bitcoin mining, on-line video clip streaming, running forex trading software, and so on. Most RDP servers providers that provide free services during trial period will request debit/credit card information which is risky for us as they can claim any payment from the card. So that encouraged me to search for RDP services providers that can provide services during free trial period without requesting credit/debit card information. This report will investigate the possible ways to get free RDP server account or RDP server account at lowest cost. The report will consist of the following parts:

1. Some RDP Services Providers with free trials
2. Some RDP servers providers that sell RDP with Credit Card, Debit Card, Bitcoin, PayPal or other E-wallets
3. Getting free RDP from freerdpserver.com
4. Getting free RDP from Google Cloud
5. Getting Google Cloud RDP VPS for free for one month through Qwiklabs.com
6. Creating RDP through Alibabacloud.com
7. Getting free RDP VPS for seven days from CloudSigma.com
8. Getting RDP VPS through Microsoft Azure
9. Getting Microsoft Azure RDP VPS for free through Sandbox subscription
10. How to get university email
11. How to get RDP service for free through Microsoft Azure for students
12. Getting free RDP from AWS Amazon
13. How to get free RDP service with Amazon AWS Educate
14. Some free websites that can be used to receive SMS online using numbers from some countries
15. Generating virtual debit/credit cards using namso gold CC BIN generator for verification of some online services accounts
